WeP Solutions Limited

1. Login Screen

Login Screen is the first screen, when application launches. User can login the application by entering valid credentials. Default Login credential are:

Username: admin

Password: admin

Figure 1: Login Screen

Label	Field	Description
1	WeP Logo	Click on WeP logo to get information about the application like app version and organization.
2	Username	User has to enter his username as configured in the application
3	Password	User has to enter his password relevant to his username.

WeP Solutions Limited

4	Remember me	If user selects remember me option then on re-launching of app, the app will automatically populate the last username used for login in username field.
5	Log in	Log in button to enter into the system if login credentials are valid.
6	Exit	To exit from the system.
7	Date	Current system date.
8	WeP Branding	WeP Solutions Ltd. Branding.

1.1 WeP Logo – on top left corner

On clicking on WeP logo, user will get all the information about the current version of application running on device and about the Organization, e.g.: WeP Solutions Limited.

Figure 2: About

WeP Solutions Limited

2. Owner's Details Screen

When a user logs in for the first time then user has to fill the details as shown in Owner Details.

Note:

1. *Owner Details screen will appear every time user logs in until he make his first bill.*
2. *After making first Bill/Invoice, user will no longer be able to modify these details except GSTIN, Ref No., Bill No. prefix. Before that user can modify "Owner Details".*

The screenshot shows the 'Owner Details' screen with the following data:

Label	Field	Description
1	NAME*	Jaggi Sweets
2	GSTIN	24TTBCR1718E1Z5
3	Reference No	reference no
4	PHONE*	9876543201
5	E-MAIL*	jaggisweets@xyz.com
6	ADDRESS*	Near Anardana chowk, Adalat bazaar, Patiala
7	BillNo Prefix	JS
8	POS*	Punjab 03
9	IS MAIN OFFICE	Yes

Buttons at the bottom:

- Add (arrow 10)
- Clear (arrow 11)
- Close (arrow 12)

Figure 3 : Owner's Detail

Label	Field	Description
1	Name	Name of the owner.
2	GSTIN	GSTIN code of the owner. Must be 15 characters.

WeP Solutions Limited

3	Reference number	Reference number is unique number generated while registering on the WeP GSP Panel.
4	Phone	Phone number of the owner. (Limit: 10 digits only)
5	Email	Email id of the owner.
6	Address	Address of the owner.
7	Bill number Prefix	Bill number Prefix. (If any)
8	POS	Place of supply of the owner.
9	Is Main Office?	Whether the mentioned address is main office or not.
10	Add	Add/Update owner's details into the database.
11	Clear	Clear all the fields.
12	Close	Close the current screen.

WeP Solutions Limited

3. Home Screen

Home Screen provides mechanism to access various billing and configuration modules.

Figure 4 : Home Screen

Label	Field	Description
1	Username	Shows name of the user currently logged in.
2	Date	System Date.
3	Screen Name	Name of the current screen.
4	Screenshot	Allows user to take screenshots. Screenshots will be saved at Device Storage > WeP_ScreenShots
5	Logout	Logout.

WeP Solutions Limited

3.1 Dine In

Upon selecting DineIn service, user first has to select the table and waiter. Once table and waiter are selected, it will automatically be redirected towards DineIn Service module.

User can also do advance table booking , check status of table(s) being occupied or directly go to DineIn without selecting table and waiter, if he wants to access already made KOT.

WeP Solutions Limited

		Green table is the user selected table. Orange Table shows advance booked table.
2	Table Split	Application provides facility for user to split a table so that two or more different consumers can share it. This option can be enabled/disabled from settings. See Details
3	Waiters	Waiters can be assigned to the table. Same waiter can also be assigned to multiple tables.
4	Table Booking	To book a table for a customer in advance for the same day. See Details
5	Cancel	To cancel and go back to home screen.
6	Dine in	It will redirect you to the DineIn screen without table and waiter selection.
7	OK	Once table is selected and waiter has been assigned user will enter to the "Dine In" screen where KOT can be made for customer.
8	Table Status	Here user can find out which all tables are occupied/booked

WeP Solutions Limited

3.1.1 Table Booking

Allows a user to book a table in advance.

The screenshot shows a mobile application titled "Table Booking". At the top, it displays "ADMIN Date:18-09-2017". Below is a table with columns: S.No, Customer Name, Time For Booking, Table No, Mobile No, and Delete. The table lists 11 entries. At the bottom, there is a search interface with fields for "Customer Name" (labeled 1), "Time" (labeled 2), "Search Mobile No" (labeled 3), "Table" (labeled 4), and "Mobile No" (labeled 5). Below these are "Search" (labeled 6), "Clear" (labeled 7), and "Close" (labeled 8) buttons. To the right are "Book" (labeled 9) and "Update" (labeled 10) buttons. A red line connects the "Mobile No" field to the "9874561230" value in the table.

S.No	Customer Name	Time For Booking	Table No	Mobile No	Delete
1	Sachin verma	11:44	1	9876543201	
2	Vishal	11:49	2	7890654321	
3	Mustang garg	11:50	3	5698740321	
4	Rajesh kumar	16:50	3	9865412302

11	Ram singh	15:01	3	6258931458	

Figure 6: Table Booking

Label	Field	Description
1	Customer Name	Name of the customer.
2	Time	Booking time.
3	Search Mobile no.	Search table by customer mobile number.
4	Table	Choose table to book.
5	Search	Search.
6	Clear	Clears all fields.

WeP Solutions Limited

7	Close	Closes the current screen.
8	Customer Mobile	Mobile number of the customer.
9	Book	Saves the details into database.
10	Update	Updates an existing record.

3.1.2 Table Status

Allows a user to check table booking status.

The screenshot shows a mobile application titled "Table Status". The top navigation bar includes a back arrow, the text "ADMIN Date:18-09-2017", the WeP logo, and icons for home and refresh. The main content area displays a table of table bookings:

S.No	Table No	In Time	Status
1	5	12:22:12	Occupied
2	10	12:22:36	Occupied
3	2	12:23:40	Occupied
4	9	12:23:55	Occupied
5	12	12:24:14	Occupied
6	1	12:24:38	Occupied
7	4	12:24:54	Occupied
8	3	12:25:09	Occupied
9	6	12:25:21	Occupied
10	7	12:25:35	Occupied
11	8	12:25:47	Occupied

Below the table are three buttons: "Search", "Clear", and "Close". Arrows numbered 1 through 4 point to the table list, search bar, search button, and clear button respectively.

Figure 7: Table Status

Label	Field	Description
1	Tables List	List of tables with their booking status.

WeP Solutions Limited

2	Search	Search table by table number.
3	Clear	Clears all fields.
4	Close	Closes the current screen.

3.1.3 Dine In Billing Screen

Figure 8 : Dine in Screen

Label	Field	Description
1	Mobile number	<p>User can fetch customer data by entering his mobile number. If the mobile number already exists in the system, it will automatically be fetched and populate customer GSTIN.</p> <p><i>Note: User cannot add a new customer here.</i></p>

WeP Solutions Limited

2	Customer GSTIN	Customer's GSTIN.
3	Table Number	Table number for which KOT is being generated.
4	Waiter Name	Name of the waiter who is assigned to that table.
5	Items List	User can choose items from the items list according to customer's choice.
6	Interstate	If user is supplying items out of the state then he has to check the Interstate checkbox and select the state to which he is supplying his items. <i>Note: IGST will be applied.</i>
7	Search Item Name	User can search for an item by its name.
8	Search Item Code	User can search for an item by its code.
9	Kitchen Order Taken (KOT)	The list shows the selected items that customer ordered. Items can be added and removed from the list before paying for the bill.
10	Order Number	Shows which order number it is.
11	Save KOT	This saves the KOT for particular table. Multiple KOTs can be saved for a table. After billing for that table, KOT is cleared.
12	Print/Save KOT	Besides saving the KOT for a table, it also prints the KOT.
13	Print Bill	User can directly print the bill. Directly printing the bill will make payment mode by cash by default.
14	Pay bill	Provide various modes of payment. e.g.: credit card, e-Wallet.
15	Clear	Clear all the details and fields.

WeP Solutions Limited

16	Delete Bill	Deletes the existing bill from the database by bill date and bill number. Deleting a bill requires manager's authentication.
17	Reprint Bill	User can reprint an existing bill by the bill no. and bill date.
18	KOT Status	Tells user about "In time" which the time at which the table has been occupied.
19	Load KOT	Allows user to load a saved KOT of a table
20	Modify KOT	Allows user to modify KOT of a table. <i>Note: Modification can be done only after loading KOT for a table.</i>
21	Reprint KOT	Allows user to print KOT again according to table number and table split number.
22	Cancel Order	Allows user to void KOT.
23	Shift Table	Allows user to shift KOT from one table to another. e.g.: If a KOT was generated for table 4 and now the customer has shifted to another table, say table no. 1 then Shift table will help user to shift table 4 KOT to table 1.
24	Merge Table	Allows user to merge KOTs of two or more different tables. e.g.: Suppose a party came and user is not able to accommodate all of them in one table then user can merge KOTs of two or more tables.
25	Business Date	Business Date will appear on billing screen if user changes his business day other than present day.

Note: After DayEnd whether auto or manual ([See Details](#)) all KOTs will be cleared.

WeP Solutions Limited

3.1.3.1 Load KOT

Allows user to load already saved KOT.

Figure 9: Load KOT

Label	Field	Description
1	List of Saved KOTs	List of KOTs.
2	Close	Closes the current screen.
4	Load KOT	Load KOT of selected table.

WeP Solutions Limited

3.1.3.2 Modify KOT

Allows user to modify an already existing KOT.

Figure 10: First load KOT of a table to modify.

Figure 11: Click on modify to enable editing.

WeP Solutions Limited

3.1.3.3 Shift Table

Allows user to link existing KOT to a different table number.

WeP Solutions Limited

3.2 Counter Sales

This module provides billing for counter sales service. Order can be made even without entering the customer details and without saving KOT.

Figure 14 : Counter Sales

Label	Field	Description
1	GSTIN	Customer's GSTIN.
2	Name*	Name of the customer.
3	Mobile number*	Customer's mobile number. User can also search his customer through his mobile number. If any record exists of the customer corresponding to that mobile number the data in fields 1, 2 and 4 will automatically be populated.

WeP Solutions Limited

4	Address	Address of the customer.
5	Add	If no customer record exists corresponding to the mobile number entered then user can add a new customer by clicking on the "Add" button after filling all the mandatory details of the customer.
6	Items List	User can choose items from the items list according to customer's choice.
7	Search Item Name	User can search for an item by its name.
8	Search Item Code	User can search for an item by its code.
9	Interstate	If user is supplying items out of the state then he has to check the Interstate checkbox and select the state to which he is supplying his items. <i>Note: IGST will be applied.</i>
10	Oder number	Shows which order number it is.
11	Kitchen Order Taken (KOT)	The list shows the selected items that customer wants to buy. Items can be added and removed from the list before printing/paying for the bill.
12	Print Bill	User can directly print the bill. Directly printing the bill will make payment mode by cash by default.
13	Pay bill	Provide various modes of payment. e.g.: credit card, e-Wallet.
14	Clear	Clear all the details and fields.
15	Delete Bill	Deletes the existing bill from the database by bill date and bill number. Deleting a bill requires manager's credentials.
16	Reprint Bill	User can reprint an existing bill by the date on bill

WeP Solutions Limited

		that bill has been generated & the bill number.
--	--	---

*Mandatory fields

3.3 Take Away

This module facilitates the billing for take away service. Here entering the customer details are mandatory.

Figure 15 : Take Away

Label	Field	Description
1	GSTIN	Customer's GSTIN.
2	Name*	Name of the customer.
3	Mobile number*	Customer's mobile number. User can also search his customer through his mobile number. If any record exists of the customer corresponding to

WeP Solutions Limited

		that mobile number the data in fields 1, 2 and 4 will automatically be populated.
4	Address	Address of the customer.
5	Add	If no customer record exists corresponding to the mobile number entered then user can add a new customer by clicking on the "Add" button after filling all the mandatory details of the customer.
6	Items List	User can choose items from the items list according to customer's choice.
7	Search Item Name	User can search for an item by its name.
8	Search Item Code	User can search for an item by its code.
9	Interstate	If user is supplying items out of the state then he has to check the Interstate checkbox and select the state to which he is supplying his items. <i>Note: IGST will be applied.</i>
10	Oder number	Shows which order number it is.
11	Kitchen Order Taken (KOT)	The list shows the selected items that customer wants to buy. Items can be added and removed from the list before paying for the bill.
12	Save KOT	Saves the KOT in database which can be modified before printing/paying the bill. This doesn't print the KOT.
13	Print/Save KOT	First saves the KOT in database and then prints it.
14	Print Bill	Bill can be printed only after saving the KOT. If KOT is not saved into the database print bill option will remain disabled. Directly printing bill is used when mode of payment is cash.

WeP Solutions Limited

15	Pay Bill	Provides different modes of payment. e.g.: credit card, e-wallet. The option will remain disabled until KOT is not saved.
16	Clear	Clear all the details and fields.
17	Delete Bill	Deletes the existing bill from the database by bill date and bill number. Deleting a bill requires manager's credentials.
18	Reprint Bill	User can reprint an existing bill by the date on bill that bill has been generated & the bill number.
19	Pickup Status	Pickup status shows whether the order has been picked up by the customer or not. It also shows user whether the bill amount has been paid or not. After order has been placed user can see Customer Pending Orders in pickup status. Print Bill that means mode of payment is cash and customer has picked up his order. Therefore this order will not appear in pickup status. If PayBill is used to make payment (even cash), then those orders will appear in pickup status. If payment is not done then user can still modify/cancel the order. After payment has been done, user can confirm the pickup status by finishing the order. Once the order has been finished, it will be removed from customer pending orders.

*Mandatory fields

Note: After DayEnd whether auto or manual ([See Details](#)) all KOTs will be cleared.

WeP Solutions Limited

3.3.1 Pick up Status

Pickup Status screen shows whether the orders made in Take away service modules are picked up by the customers or not. If Print Bill is used, then it's assumed that payment is made by cash and order has been picked up, hence order will not display here. Else if Pay Bill was used, then it's assumed that order is yet to be picked and hence will be displayed here.

Even if payment is not made but order is made for the customer, it will be displayed here, with payment status: Not paid.

S.No	Item Name	Qty
1	ONION PARANTHA	1
2	GOBI PARANTHA	1
3	RAJMA CHAWAL	2
4	POORI SABZI	4

Figure 16 : Pickup Status

Label	Field	Description
1	Customer Pending order	List of customers, whose orders are yet to pick up.

WeP Solutions Limited

2	Pending order details	KOT ordered by customer.
3	Customer Details	Details of the customer.
4	Modify Order*	Allows user to modify the order for the customer only if bill is not paid yet.
5	Pay bill	Allows user to make payment for the customer only if bill is not paid yet.
6	Cancel Order	User can cancel the order if its bill is not paid yet. But if bill is paid then cancelling the order will delete the bill.
7	Clear	Clear will clear all the fields.
8	Close	Closes the current screen.

Note:

1. Once bill amount is paid, user cannot modify the order but he will be provided with options to finish the order or to print the bill again.
2. The bill will be deleted if paid order is being cancelled.

WeP Solutions Limited

3.4 Home Delivery

This module facilitates the billing for Home Delivery. Entering customer details is mandatory to make order.

Figure 17 : Home Delivery

Label	Field	Description
1	GSTIN	Customer's GSTIN.
2	Name*	Name of the customer.
3	Mobile number*	Customer's mobile number. User can also search his customer through his mobile number. If any record exists of the customer corresponding to that mobile number the data in fields 1, 2 and 4 will automatically be populated.

WeP Solutions Limited

4	Address	Address of the customer.
5	Add	If no customer record exists corresponding to the mobile number entered then user can add a new customer by clicking on the "Add" button after filling all the mandatory details of the customer.
6	Items List	User can choose items from the items list according to customer's choice.
7	Search Item Name	User can search for an item by its name.
8	Search Item Code	User can search for an item by its code.
9	Interstate	If user is supplying items out of the state then he has to check the Interstate checkbox and select the state to which he is supplying his items. <i>Note: IGST will be applied.</i>
10	Oder number	Shows which order number it is.
11	Kitchen Order Taken (KOT)	The list shows the selected items that customer wants to buy. Items can be added and removed from the list before paying for the bill.
12	Save KOT	Saves the KOT in database which can be modified before printing/paying the bill.
13	Print/Save KOT	First saves the KOT in database and then sends a print command to the printer to print the KOT.
14	Print Bill	Bill can be printed only after saving the KOT. If KOT is not saved into the database print bill option will remain disabled. Directly printing the bill will make payment mode by cash by default.
15	Pay Bill	Provides different modes of payment. e.g.: credit card, e-wallet. The option will remain disabled

WeP Solutions Limited

		until KOT is not saved.
16	Clear	Clear all the details and fields.
17	Delete Bill	Deletes the existing bill from the database by bill date and bill number. Deleting a bill requires manager's credentials.
18	Reprint Bill	User can reprint an existing bill by the date on bill that bill has been generated & the bill number.
19	Deliver Status	Once KOT is saved user can see customer pending orders in deliver status where he can assign a rider for that order who is going to deliver the order. If payment is done then the amount due will be 0. If payment is not done then the amount due will be the bill amount. Once the rider has been assigned then user can update the order delivery status from "COD Settlement" by updating the amount that that rider has received from the customer.

*Mandatory fields

Note:

1. Unless COD is made for the bill, a bill details won't be reflected in reports.
2. After DayEnd whether auto or manual (See Details) all KOTs will be cleared.

WeP Solutions Limited

3.4.1 Delivery Status

Here list of order to get delivered are displayed. After clicking on the order, its details are displayed along with the customer details, for which the order is made. Payment status is also displayed as Paid or Cash on Delivery. Rider is assigned for home delivery of order and later COD settlement is made.

Figure 18 : Home Delivery Status

Label	Field	Description
1	Customer Pending order	List of customers whose orders are pending or home delivery.
2	Pending order details	KOT ordered by customers.

WeP Solutions Limited

3	Customer Details	Details of the customer.
4	Assign Rider	Allows user to see a list of all the riders and choose one of them in order to assign delivery of order.
5	Rider details	Details of the rider.
6	Ok	Allows user to assign the rider for that order.
7	Print Bill	Print the bill.
8	Modify Order	Allows user to modify the order for the customer if bill is not paid yet.
9	COD Settlement	Allows user to update the due amount once rider come back after delivering the order.
10	Cancel Order	User can cancel the order if its bill is not paid yet.
11	Clear	Clear will clear all the fields.
12	Close	Closes the current screen.

Note:

1. Once bill amount is paid, user cannot modify the order.
2. The bill will be deleted if paid order is being cancelled.

WeP Solutions Limited

3.4.2 COD Settlement

The screenshot shows the 'Rider Settlement' screen. On the left, there is a table with columns: Rider Code, Bill Number, Total Items, Bill Amount, and Petty Cash. The table contains three rows of data. On the right, there is a form with fields for Bill Number, Bill Amount, Other Charges, Petty Cash, Discount Amt, Coupon Amt, Amount Due, and Settled Amount. The 'Amount Due' field has the value '1380'. The 'Settled Amount' field also has the value '1380' and is highlighted with a red border. At the bottom, there are three buttons: CLOSE, CLEAR, and UPDATE.

Rider Code	Bill Number	Total Items	Bill Amount	Petty Cash
2	4	7	870	0
2	5	6	525	0
2	6	7	1380	0

Bill Number: 6

Bill Amount: 1380

Other Charges: 0

Petty Cash: 0

Discount Amt: 0

Coupon Amt: 0

Amount Due: 1380

Settled Amount: 1380

Buttons at the bottom:

- CLOSE
- CLEAR
- UPDATE

Labels for steps:

- 1 ← (points to the Order & Rider Details section)
- 2 → (points to the Bill Amount Details section)
- 3 (points to the CLOSE button)
- 4 (points to the CLEAR button)
- 5 (points to the UPDATE button)

3	Close	Closes the current screen.
4	Clear	Clears will clear all the fields.
5	Update	Updates the due amount and closes the order.

WeP Solutions Limited

Delete Bill

To delete a bill, user has to put the bill number and the date on which the bill was made. For deleting bill user requires manager's credentials.

The interface is titled "Delete Bill". It features a "Bill Number" input field and a "Bill Date" input field containing "18-09-2017", accompanied by a calendar icon. Below the input fields are "Cancel" and "Delete" buttons.

Figure 20: Delete Bill

Re Print Bill

To re-print a bill user has to put bill number and the date on which the bill was made.

The interface is titled "RePrint Bill". It features a "Bill Number" input field and a "Bill Date" input field containing "18-09-2017", accompanied by a calendar icon. Below the input fields are "Cancel" and "RePrint" buttons.

Figure 21: Re-print bill

3.5 Payment/Receipt

This module provides mechanism to enter expenses like electricity bill, water bill, etc.

WeP Solutions Limited

The screenshot shows a mobile application interface for managing payments and receipts. At the top, there is a red header bar with the text "ADMIN Date:31-07-2017" on the left, the "Payment/Receipt" title in the center, and navigation icons on the right. Below the header, the main content area contains five input fields labeled 1 through 5:

- 1**: A radio button group where the "Payment" option is selected.
- 2**: A date input field showing "28-07-2017", with a calendar icon to its right.
- 3**: A description input field containing "electricity".
- 4**: A reason input field containing "electricity bill".
- 5**: An amount input field containing "1200".

At the bottom of the form are three blue buttons: "Save", "Clear", and "Close". Below these buttons are three numbers: **6**, **7**, and **8**, each with a downward arrow pointing towards the buttons.

Figure 22 : Payment & Receipt

Label	Field	Description
1	Payment/Receipt	User can choose whether he is making an entry for a payment or receipt.
2	Date	Allows user to choose a date on which payment/receipt was made.
3	Description	Description for the payment/receipt. Descriptions can be configured. See Details.
4	Reason	Reason for making payment/receipt.
5	Amount	The amount paid for payment/receipt.

WeP Solutions Limited

3.6 Masters

Masters Screen provides mechanism to access modules.

Figure 23: Master Screen

3.6.1 Configuration Screen

Configuration screen allows user to configure the application by providing few options that will help him a lot to manage many things.

- User can manage by categorizing food items and beverages under department and category.
- It allows user to configure kitchens.
- User can configure various Payments/Receipts in an organized manner.
- Discounts & Coupons can be configured and availed to the customer at the time of billing.

WeP Solutions Limited

- User can also add “**Other charges**” which are customizable and applicable while billing.

3.6.1.1 Department

A restaurant can have multiple departments according to what type of food & beverages they are providing. e.g.: Beverages, Main Course.

S.No	Dept Name	
1	Main Course	<input type="button" value="X"/>
2	Snacks	<input type="button" value="X"/>
3	Beverages	<input type="button" value="X"/>
4	Desserts	<input type="button" value="X"/>

Figure 24: Department Configuration

Label	Field	Description

4	Add	Button to add new department name into

WeP Solutions Limited

		database.
5	Update	Update details of an existing department.
6	Clear	Clears all the fields.
7	Close	Closes the current screen.

3.6.1.2 Category

User can categorize the items in their own way. e.g.: a restaurant has a department which take care of beverages. Now beverages can be categorized into “Soft Drinks” & “Alcohol”.

The screenshot shows a mobile application interface for managing categories. At the top, there's a red header bar with the title "Configurations". Below the header, there are tabs for "DEPARTMENT", "CATEGORY", "KITCHEN", "PAYMENT/RECEIPT", "DISCOUNT", "COUPON", and "OTHER CHARGES". On the left, there's a navigation bar with icons for back, forward, and search. The main content area contains a form for adding a category. It has a text input field for "Category Name" with a placeholder "Category Name" and a red arrow pointing to it. Below it is a dropdown menu for "Department Name" with a placeholder "Select" and a red arrow pointing to it. To the right of the dropdown is a table showing a list of categories and their corresponding departments. The table has columns for "S.No", "Category", and "Dept Name". The data in the table is:

S.No	Category	Dept Name
1	Soft Drinks	Beverages
2	Alcohol	Beverages
3	Dry	Main Course
4	Gravy	Main Course

Below the table are four buttons: "Add", "Update", "Clear", and "Close". Arrows numbered 1 through 7 point from the labels in the table below to the corresponding elements in the screenshot. The labels are:

- 1: Category Name
- 2: Department Name
- 3: Table
- 4: Add
- 5: Update
- 6: Clear
- 7: Close

Figure 25 : Category Configuration

Label	Field	Description
1	Category name	Name of the Category user wants to add.
2	Category List	List of the Category.
3	Delete	Delete Category from the list.

WeP Solutions Limited

4	Add	Button to add new Category name into database.
5	Update	Update details of an existing Category.
6	Clear	Clear will clear all the fields.
7	Close	Closes the current screen.

3.6.1.3 Kitchen

User can configure different types of kitchens, they have in their restaurants. e.g.: A kitchen where vegetarian food is prepared and a kitchen where non-vegetarian food is prepared.

The screenshot shows a mobile application interface for 'Configurations'. At the top, there's a red header bar with the title 'Configurations' and navigation icons. Below the header, there are tabs for 'DEPARTMENT', 'CATEGORY', 'KITCHEN' (which is currently selected), 'PAYMENT/RECEIPT', 'DISCOUNT', 'COUPON', and 'OTHER CHARGES'. The main content area displays a table with two rows:

S.No.	Description
1	Veg
2	Non veg

Below the table are four blue buttons labeled 'Add', 'Update', 'Clear', and 'Close'. Arrows numbered 1 through 7 point to specific elements: 1 points to the 'Kitchen Name' input field; 2 points to the table header; 3 points to the delete icon in the table; 4 points to the 'Add' button; 5 points to the 'Update' button; 6 points to the 'Clear' button; and 7 points to the 'Close' button.

4	Add	Button to add Payment/Receipt into database.
5	Update	Update details of an existing Payment/Receipt.
6	Clear	Clear will clear all the fields.
7	Close	Closes the current screen.

3.6.1.5 Discount

Avaling discounts to the customers is now made easy. User can configure various types of discounts, in percentage and can be used at the time of billing.

The screenshot shows the 'Configurations' screen with the 'DISCOUNT' tab selected. The interface includes a header with the date '08-09-2017' and tabs for 'DEPARTMENT', 'CATEGORY', 'KITCHEN', 'PAYMENT/RECEIPT', 'DISCOUNT', 'COUPON', and 'OTHER CHARGES'. Below the tabs is a table of configured discounts:

S.No	Description	Percent
1	Onam	5
2	Diwali bumper	23
3	New Year	10

Annotations numbered 1 through 6 point to specific elements:

- 1: Points to the 'Discount Description' input field.
- 2: Points to the 'Discount Percent' input field.
- 3: Points to the 'Add' button at the bottom.
- 4: Points to the 'Update' button at the bottom.
- 5: Points to the 'Clear' button at the bottom.
- 6: Points to the 'Close' button at the bottom.

*Please note % entered is taken upto 2 digits after decimal

5	Clear	Clear will clear all the fields.
6	Close	Closes the current screen.

3.6.1.6 Coupon

User can configure various coupons with amount and can use them at the time of billing.

e.g.: Sodexo coupons.

The screenshot shows the 'Configurations' screen with the 'COUPON' tab selected. The interface includes a header with the date '04-01-2014' and a navigation bar with links for DEPARTMENT, CATEGORY, KITCHEN, PAYMENT/RECEIPT, DISCOUNT, COUPON, and OTHER CHARGES. The main area contains fields for 'Coupon Description' and 'Coupon Amount', and a table displaying a single coupon entry. At the bottom, there are four buttons: 'Add', 'Update', 'Clear', and 'Close', each associated with a number (4, 5, 6, 7) indicating its function.

S.No	Description	Amount
1	soxedo 50	50

Figure 29 : Coupons Configuration

WeP Solutions Limited

Label	Field	Description
1	Coupon Description	Description of the Coupon provided by the user.
2	Coupon Amount	Coupon in amount.
3	Delete	Delete a coupon from the list.
4	Add	Button to add Coupon into database.
5	Update	Update details of an existing Coupon.
6	Clear	Clear all the fields.
7	Close	Closes the current screen.

3.6.1.7 Other Charges

User can apply extra charges to a particular service and can decide whether to charge customer or not by clicking on the check box. If check box is checked, then the amount is chargeable and will automatically be added into total bill. User can apply charges on a single or multiple services'. e.g.: User can apply other charges (as packing charges) to Home delivery mode and/or to take away mode.

The screenshot shows the 'Configurations' screen with the 'OTHER CHARGES' tab selected. The interface includes the following elements:

- Fields:** 'Other Charges Description' (text input), 'Other Charges Amount' (text input), 'Chargeable' (checkbox), 'Charges Modes' (dropdown).
- Table:** A grid displaying existing charges with columns: S.No, Description, Amount, Chargeable, and Modes. The table contains two rows:

S.No	Description	Amount	Chargeable	Modes
1	packing charges	70	Yes	Take Away <input checked="" type="checkbox"/>
2	packing charges	70	Yes	Home Delivery <input checked="" type="checkbox"/>
- Buttons:** 'Add', 'Update', 'Clear', 'Close'.

Annotations numbered 1 through 9 point to specific UI elements:

- 1: Points to the 'Other Charges Description' field.
- 2: Points to the 'Other Charges Amount' field.
- 3: Points to the 'Chargeable' checkbox.
- 4: Points to the 'Charges Modes' dropdown.
- 5: Points to the table containing the charge list.
- 6: Points to the 'Add' button.
- 7: Points to the 'Update' button.
- 8: Points to the 'Clear' button.
- 9: Points to the 'Close' button.

WeP Solutions Limited

Figure 30 : Other Charges Configuration

Label	Field	Description
1	Other charge Description	Description of the Other charge provided by the user.
2	Other charge Amount	Other charge in amount.
3	Chargeable	Check the checkbox if user wants to charge for this other charges.
4	Charges mode	To which mode the other charge will be applied.
5	Delete	Delete Other charge from the list.
6	Add	Button to add Other charge into database.
7	Update	Update details of an existing Other charge.
8	Clear	Clear will clear all the fields.
9	Close	Closes the current screen.

3.6.2 Outward Supply Items

This allows user to configure an item that he is going to sell to the customer. User can configure following attributes about an item:

- a. Item name
- b. Kitchen
- c. Department
- d. Category
- e. Goods/Service
- f. Three different rates (Rate 1, Rate 2, Rate 3) {which rate is to apply can be configured in configuration. [See Details.](#)}
- g. Stock

WeP Solutions Limited

- h. Unit of measurement
- i. CGST, SGST, IGST and cess tax if applicable
- j. Item code, if enabled in settings ([See Details.](#))
- k. HSN code
- l. Discount (in percentage. Item wise discount can be enabled or disabled. [See Details.](#))

These attributes can be modified for an existing item. He can also upload an image for the item for a visual reference.

For huge amount of data about items, user can use a .csv file to import/load items from that file. Items in list are displayed in ascending order of Item code.

Note: Previous data will be replaced on loading a .csv file. To save the previous data we recommend you to create a backup of the database first.

3.6.4.3 Supplier Item Linkage

This module provides mechanism to link the supplier already saved in database, with the inward items being entered in database. This linkage is easing the process of making entry in Purchase Order and Goods Inward. During Purchase Order or Goods Inward generation, upon entering the supplier details, all the items linked to that supplier is made available, instead of whole list of items.

WeP Solutions Limited

WeP Solutions Limited

3.6.4.4 Purchase Order

Purchase Order can be made for the items being purchased or inward.

The screenshot shows the WeP Purchase Order screen. At the top, there are fields for Supplier Name (MAHESH), Supplier Phone (9876054321), and Supplier Address (banerghatta road). Below these are buttons for 'Purchase Order' (labeled 4), 'Add Item' (labeled 9), and 'Supplier StateCode' (labeled 8). The main area displays a table of items with columns for Sno, HSNCode, Item Name, Rate, Qty, UoM, Taxable Value, IGST Amt, CGST Amt, SGST Amt, cess Amt, Amount, and Del. The table contains six rows of data. At the bottom, there are buttons for 'Additional Charge' (labeled 10), 'Add Supplier' (labeled 15), 'Generate PO' (labeled 16), 'Update PO' (labeled 17), 'Clear' (labeled 18), and 'Close' (labeled 19). Arrows numbered 1 through 19 point to various UI elements: 1 to Supplier Name, 2 to Supplier Phone, 3 to Supplier Address, 4 to Purchase Order button, 5 to Item Name field, 6 to 'Enter the quantity' placeholder, 7 to Supplier GSTIN, 8 to Supplier StateCode checkbox, 9 to Add Item button, 10 to Additional Charge checkbox, 11 to 'Additional Charge' label, 12 to 'Additional Amount' label, 13 to Sub Total, 14 to Grand Total, 15 to Add Supplier button, 16 to Generate PO button, 17 to Update PO button, 18 to Clear button, and 19 to Close button.

5. Amend Module

5.1 GSTR2

The screenshot illustrates the 'Amendments' section of the GSTR2 module. The interface is divided into several sections:

- Original Details:** Supplier Type*, GSTIN/Name*, InvoiceNo*, Invoice Date*.
- Revised Details:** Invoice No*, Invoice Date*.
- Taxable Value:** G/S.
- GST Rates:** IGST Rate(%) 0, IGST Amount 0; CGST Rate(%) 0, CGST Amount 0; SGST Rate(%) 0, SGST Amount 0; Cess Rate(%) 0, Cess Amount 0.
- Supplier's POS:** Supplier's POS dropdown.
- Table:** A grid showing rows with columns for Sno, GSTIN, Inv No, Inv Date, GSTIN, Inv No, Inv Date, G/S, Taxable, Value, Amt, Amt, Amt, Amt, and Delete.
- Buttons:** Load, Add, Clear, Close.

Annotations numbered 1 through 12 point to specific fields and controls on the screen:

- Supplier Type*
- GSTIN/Name*
- InvoiceNo*
- Invoice Date* dd-MM-yyyy calendar icon
- IGST Rate(%) 0
- IGST Amount 0
- CGST Rate(%) 0
- CGST Amount 0
- SGST Rate(%) 0
- SGST Amount 0
- Cess Rate(%) 0
- Cess Amount 0
- Load button
- Add button
- Clear button
- Close button

		supplier.
3	Invoice number	Invoice number for which amends are supposed to me made.
4	Invoice date	Date on which the invoice was generated.
5	Taxable Value	Applicable taxable value.
6	G/S	Whether it was goods or services.
7	IGST/CGST/SGST (%)	Percentage of tax which is applicable on goods/services
8	IGST/CGST/SGST/cess amount	Tax applicable on goods/services in amount.
9	Load	Load any existing amends for that invoice number and invoice date.
10	Add	Add a new amend to the database.
11	Clear	Clears all the fields.
12	Close	Closes the current screen.

WeP Solutions Limited

5.2 GSTR1 B2B

The screenshot shows the 'Amendments' section of the GSTR1 B2B application. Key fields include:

- Original Details:** GSTIN*, InvoiceNo*, Invoice Date*
- Revised Details:** GSTIN(Ecommerce), Invoice No*, Invoice Date*
- Taxable Value***: Includes dropdowns for **G**oods or **S**ervices.
- G/S**: Goods or Services indicator.
- IGST Rate(%):** 0, **IGST Amount:** 0
- CGST Rate(%):** 0, **CGST Amount:** 0
- SGST Rate(%):** 0, **SGST Amount:** 0
- Cess Amount:** 0

A table lists amendments with columns: Sno, Original Details (GSTIN, Inv No, Inv Date), Revised Details (GSTIN(Ecomm), Inv No, Inv Date), Taxable, IGST, CGST, SGST, Cess, Delete. A dropdown 'CustStateCode' is also present.

Buttons at the bottom: Load (8), Add (9), Clear (10), Close (11).

Figure 59 : GSTR1 B2B Amend

Label	Field	Description
1	GSTIN	User can enter either GSTIN of the supplier.
2	Invoice number	Invoice number for which amends are supposed to me made.
3	Invoice date	Date on which the invoice was generated.
4	Taxable Value	Applicable taxable value.
5	G/S	Whether it was goods or services.
6	IGST/CGST/SGST (%)	Percentage of tax which is applicable on goods/services

WeP Solutions Limited

7	IGST/CGST/SGST/cess	Tax applicable on goods/services in amount.
8	Load	Load any amend if already existing for that invoice.
9	Add	Add a new amend to database.
10	Clear	Clear every field.
11	Close	Closes the current screen.

5.3 GSTR1_B2CL

The screenshot shows the 'Amendments' screen for GSTR1_B2CL. The interface includes tabs for GSTR2_B2B, GSTR1_B2B, GSTR1_B2CL (selected), and GSTR1_B2CS. The main area contains input fields for Recipient's Name, Invoice No., Invoice Date, Taxable Value, G/S, and Cust StateCode. To the right, there are fields for IGST Rate(%), IGST Amount, and cess Amount. A legend at the bottom maps numbers 1-11 to specific actions:

- 1 ← Recipient's Name*
- 2 ← InvoiceNo*
- 3 ← Invoice Date*
- 4 → G/S
- 5 ↓ Taxable Value
- 6 } { IGST Rate(%), IGST Amount, cess Amount
- 7 ↓ Load
- 8 ↓ Add
- 9 ↓ Clear
- 10 ↓ Close

3	Invoice date	Date on which the invoice was generated.
4	G/S	Whether it was goods or services.
5	Customer State Code	Customer's state code.
6	IGST & cess	Applicable IGST in percentage and amount and cess if applied in amount.
7	Load	Load any amends if already present for that invoice.
8	Add	Add a new amend to database
9	Clear	Clear every field.
10	Close	Closes the current screen.

WeP Solutions Limited

5.4 GSTR1 B2CS

The screenshot shows the 'Amendments' section of the GSTR1 B2CS application. At the top, there are tabs for GSTR2_B2B, GSTR1_B2B, GSTR1_B2CL, and GSTR1_B2CS. The GSTR1_B2CS tab is active. The main area has a red header 'Revised Details'. On the left, there are two input fields: 'Cust StateCode' (labeled 1) and 'Tax Period' (labeled 2). Below these is a date input field 'MMyyyy' with a calendar icon. To the right of the date field is a dropdown menu labeled '3' which includes 'IGST Rate(%)', 'CGST Rate(%)', 'SGST Rate(%)', and 'Aggregate Taxable Value'. The 'Aggregate Taxable Value' field is highlighted with a red box and contains the number '4'. To the right of the dropdown are four input fields grouped by a bracket labeled '5': 'IGST Amount', 'CGST Amount', 'SGST Amount', and 'cess Amount', each with a value of '0'. Below this is a table with columns: Sno, Tax Month, G/S (Ori), StateCode (Ori), G/S (Rev), State Code (Rev), Taxable Value (labeled 4), IGST Amt, CGST Amt, SGST Amt, cess Amt, and Delete. At the bottom are four buttons: Load (labeled 6), Add (labeled 7), Clear (labeled 8), and Close (labeled 9).

Figure 61 : GSTR1 B2CS Amend

Label	Field	Description
1	Customer State Code	Customer's state code.
2	Tax Period	Tax period.
3	IGST/CGST/SGST	Tax rate in percentage.
4	Aggregate Taxable Value	Applicable aggregate taxable value.
5	IGST/CGST/SGST/cess	Tax rate in amount.
6	Load	Load already existing data for that month period
7	Add	Add a new record to database.

WeP Solutions Limited

8	Clear	Clear every field.
9	Close	Closes the current screen.

6. Credit Debit Note

The screenshot shows the 'Credit/Debit Note' screen with the following details:

- Original Invoice :** Number (1), Date (2), Reason (3).
- Differential :** IGST, CGST, UTGST/SGST.
- Amount :** 0.00, 0.00, 0.00.
- Information :**
 - Recipient Name/GSTIN (6)
 - Invoice Amount: 0.00 (7)
 - Attracts Reverse Charge (8)
 - Note Type (Credit/Debit) (9)
- Buttons:** Ok (highlighted in blue), Load (10), Add (11), Clear (12), Close (13).

*Please note all fields are compulsory
Any value entered in decimals will be taken upto 2 digits after decimal

Figure 62 : Credit Debit Note

Label	Field	Description
1	Number	Invoice number.
2	Date	Date on which note has been created.
3	Reason	Reason for taking or giving credit/debit note.
4	OK	Ok button to load details of that invoice number.

WeP Solutions Limited
