## 1. Login Screen

Login Screen is the first screen, when application launches. User can login the application by entering valid credentials. Default Login credential are:

**Username: admin**

**Password: admin**

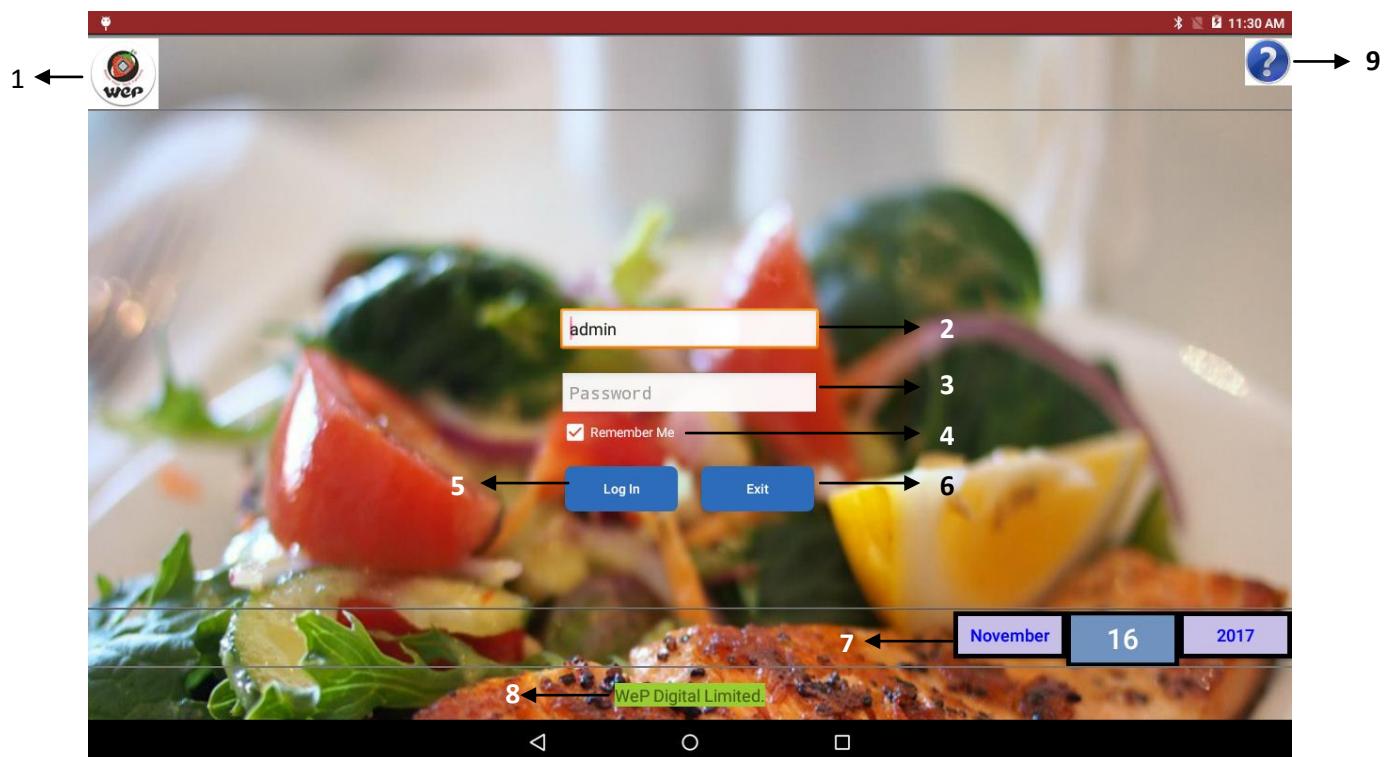

Figure 1: Login Screen

Label	Field	Description
1	WeP Logo	Click on WeP logo to get information about the application like app version and organization.
2	Username	User has to enter his username as configured in the application
3	Password	User has to enter his password relevant to his username.

### WeP Solutions Limited

4	Remember me	If user selects remember me option then on re-launching of app, the app will automatically populate the last username used for login in username field.
5	Log in	Log in button to enter into the application if login credentials are valid.
6	Exit	To exit from the system.
7	Date	Current system date.
8	WeP Branding	WeP Solutions Ltd. Branding.
9	Help	User can access Quick start guide and User manual

#### 1.1 WeP Logo – on top left corner

On clicking on WeP logo, user will get all the information about the current version of application running on device and about the Organization, e.g.: WeP Solutions Limited.

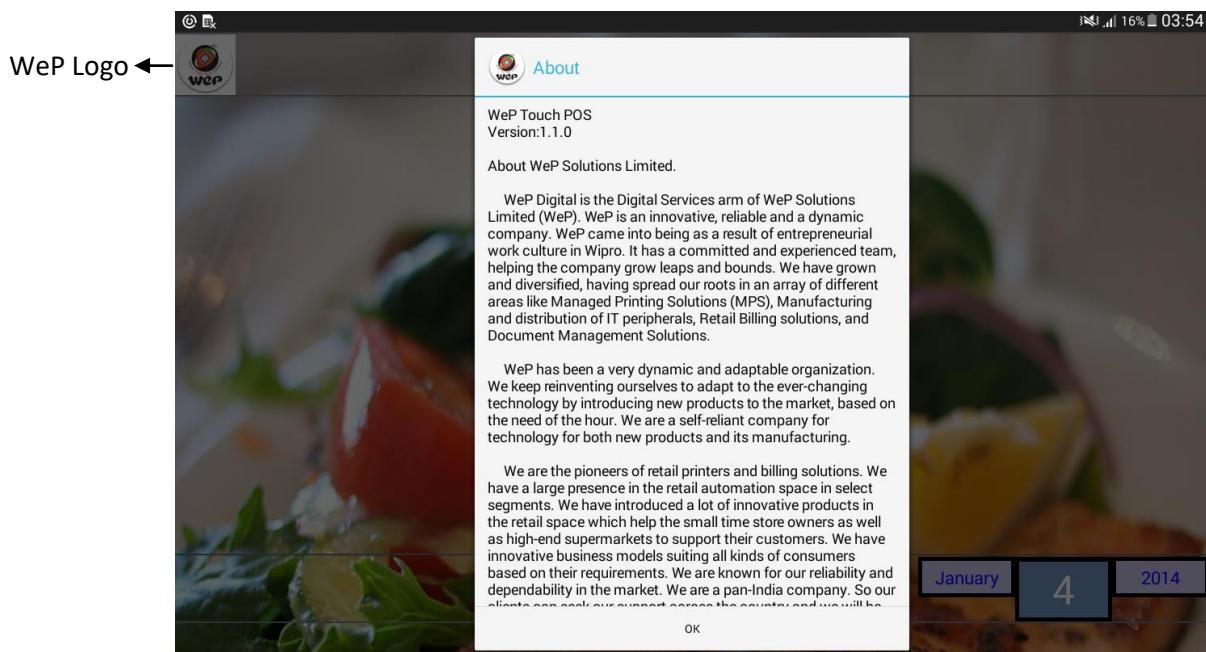

Figure 2: About

WeP Solutions Limited

## 2. Owner's Details Screen

When a user logs in for the first time then user has to fill the details as shown in Owner Details.

Note:

1. *Owner Details screen will appear every time user logs in until he makes his first bill.*
2. *After making first Bill/Invoice, user will no longer be able to modify these details except GSTIN, Ref No., Bill No. prefix. Before that user can modify "Owner Details".*

1	NAME*	Jaggi Sweets
2	GSTIN	24TTBCR1718E1Z5
3	Reference No	reference no
4	PHONE*	9876543201
5	E-MAIL*	jaggisweets@xyz.com
6	ADDRESS*	Near Anardana chowk, Adalat bazaar, Patiala
7	BillNo Prefix	JS
8	POS*	Punjab 03
9	IS MAIN OFFICE	Yes

10 Add      11 Clear      12 Close

Figure 3 : Owner's Detail

Label	Field	Description
1	Name	Name of the firm.
2	GSTIN	GSTIN code of the owner. Must be 15 characters.
3	Reference number	Reference number is unique number generated

### WeP Solutions Limited

		while registering on the WeP GSP Panel.
4	Phone	Phone number of the owner. (Limit: 10 digits only)
5	Email	Email id of the owner.
6	Address	Address of the owner.
7	Bill number Prefix	Bill number Prefix. (If any)
8	POS	Place of supply of the owner.
9	Is Main Office?	Whether the mentioned address is main office or not.
10	Add	Add/Update owner's details into the database.
11	Clear	Clear all the fields.
12	Close	Close the current screen.

WeP Solutions Limited

### 3. Home Screen

Home Screen provides mechanism to access various billing and configuration modules.

Figure 4 : Home Screen

Label	Field	Description
1	Username	Shows name of the user currently logged in.
2	Date	System Date.
3	Screen Name	Name of the current screen.
4	Screenshot	Allows user to take screenshots. Screenshots will be saved at Device Storage >WeP_ScreenShots
5	Logout	Logout.

WeP Solutions Limited

### 3.1 Dine In

Upon selecting DineIn service, user first has to select the table and waiter. Once table and waiter are selected, it will automatically be redirected towards DineIn Service module.

User can also do advance table booking, check status of table(s) being occupied or directly go to DineIn without selecting table and waiter, if he wants to access already made KOT.

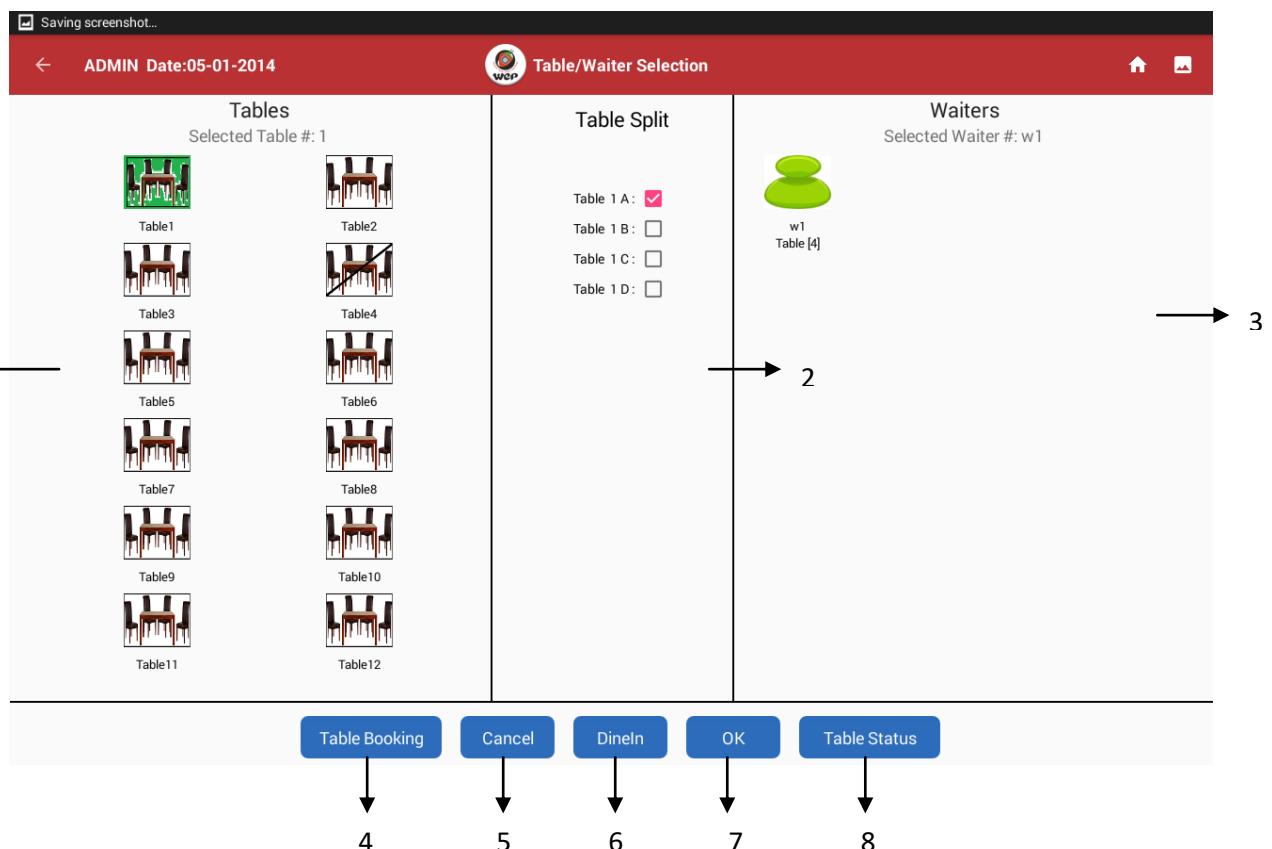

Figure 5: Table Waiter Selection

Label	Field	Description
1	Tables List	<p>It shows all the tables of his restaurant whether it is already booked or available for booking.</p> <p>Table with strike through depicts, not available for booking.</p> <p>Green table is the user selected table.</p>

### WeP Solutions Limited

		Orange Table shows advance booked table.
2	Table Split	Application provides facility for user to split a table so that two or more different consumers can share it. This option can be enabled/disabled from settings. <a href="#">See Details</a> in Section 3.6.9.4.
3	Waiters	Waiters can be assigned to the table. Same waiter can also be assigned to multiple tables.
4	Table Booking	To book a table for a customer in advance for the same day. <a href="#">See Details</a> in Section 3.1.1.
5	Cancel	To cancel and go back to home screen.
6	Dine in	It will redirect you to the DineIn screen without table and waiter selection.
7	OK	Once table is selected and waiter has been assigned user will enter to the "Dine In" screen where KOT can be made for customer.
8	Table Status	Here user can find out which all tables are occupied/booked

WeP Solutions Limited

### 3.1.1 Table Booking

Allows a user to book a table in advance.

S.No	Customer Name	Time For Booking	Table No	Mobile No	Delete
1	Sachin verma	11:44	1	9876543201

8	3	12:25:09	Occupied
9	6	12:25:21	Occupied
10	7	12:25:35	Occupied
11	8	12:25:47	Occupied

Search Table → 5      Search → 2      Clear → 3      Close → 4

Figure 7: Table Status

Label	Field	Description
1	Tables List	List of tables with their booking status.

### WeP Solutions Limited

2	Search	Search table by table number.
3	Clear	Clears all fields.
4	Close	Closes the current screen.
5	Search Table	Check status by searching table.

#### 3.1.3 Dine in Billing Screen

Figure 8 : Dine in Screen

Label	Field	Description
1	Mobile number	User can fetch customer data by entering his mobile number. If the mobile number already exists in the system, it will automatically be fetched and populate customer GSTIN in field 2.

### WeP Solutions Limited

		<i>Note: User cannot add a new customer here.</i>
2	Customer GSTIN	Customer's GSTIN.
3	Table Number	Table number for which KOT is being generated.
4	Waiter Name	Name of the waiter who is assigned to that table.
5	Items List	User can choose items from the items list according to customer's choice.
6	Interstate	If user is supplying items out of the state, then he has to check the Interstate checkbox and select the state to which he is supplying his items. <i>Note: IGST will be applied.</i>
7	Search Item Name	User can search for an item by its name.
8	Search Item Code	User can search for an item by its code.
9	Kitchen Order Taken (KOT)	The list shows the selected items that customer ordered. Items can be added and removed from the list before paying for the bill.
10	Order Number	Shows which order number it is.
11	Save KOT	This saves the KOT for particular table. Multiple KOTs can be saved for a table. After billing for that table, KOT is cleared.
12	Print/Save KOT	Besides saving the KOT for a table, it also prints the KOT.
13	Print Bill	User can directly print the bill. Directly printing the bill will make payment mode by cash by default.
14	Pay bill	Provide various modes of payment. e.g.: credit card, e-Wallet.

### WeP Solutions Limited

15	Clear	Clear all the details and fields.
16	Delete Bill	Deletes the existing bill from the database by bill date and bill number. Deleting a bill requires manager's authentication. <a href="#">See details</a> in Section 3.4.3
17	Reprint Bill	User can reprint an existing bill by the bill no. and bill date. <a href="#">See details</a> in Section 3.4.4
18	KOT Status	Tells user about "In time" which the time the table has been occupied.
19	Load KOT	Allows user to load a saved KOT of a table
20	Modify KOT	Allows user to modify KOT of a table. <i>Note: Modification can be done only after loading KOT for a table.</i>
21	Reprint KOT	Allows user to print KOT again according to table number and table split number.
22	Cancel Order	Allows user to void KOT.
23	Shift Table	Allows user to shift KOT from one table to another. e.g.: If a KOT was generated for table 4 and now the customer has shifted to another table, say table no. 1 then Shift table will help user to shift table 4 KOT to table 1.
24	Merge Table	Allows user to merge KOTs of two or more different tables. e.g.: Suppose a party came and user is not able to accommodate all of them in one table then user can merge KOTs of two or more tables.
25	Business Date	Business Date will appear on billing screen if user changes his business day other than present day.

WeP Solutions Limited

26	Preview Bill	Prints a preview of bill.
27	Barcode Search	User can search for an item by its barcode.

Note: After DayEnd whether auto or manual ([See Details](#) in Section 7) all KOTs will be cleared.

### 3.1.3.1 Load KOT

Allows user to load already saved KOT.

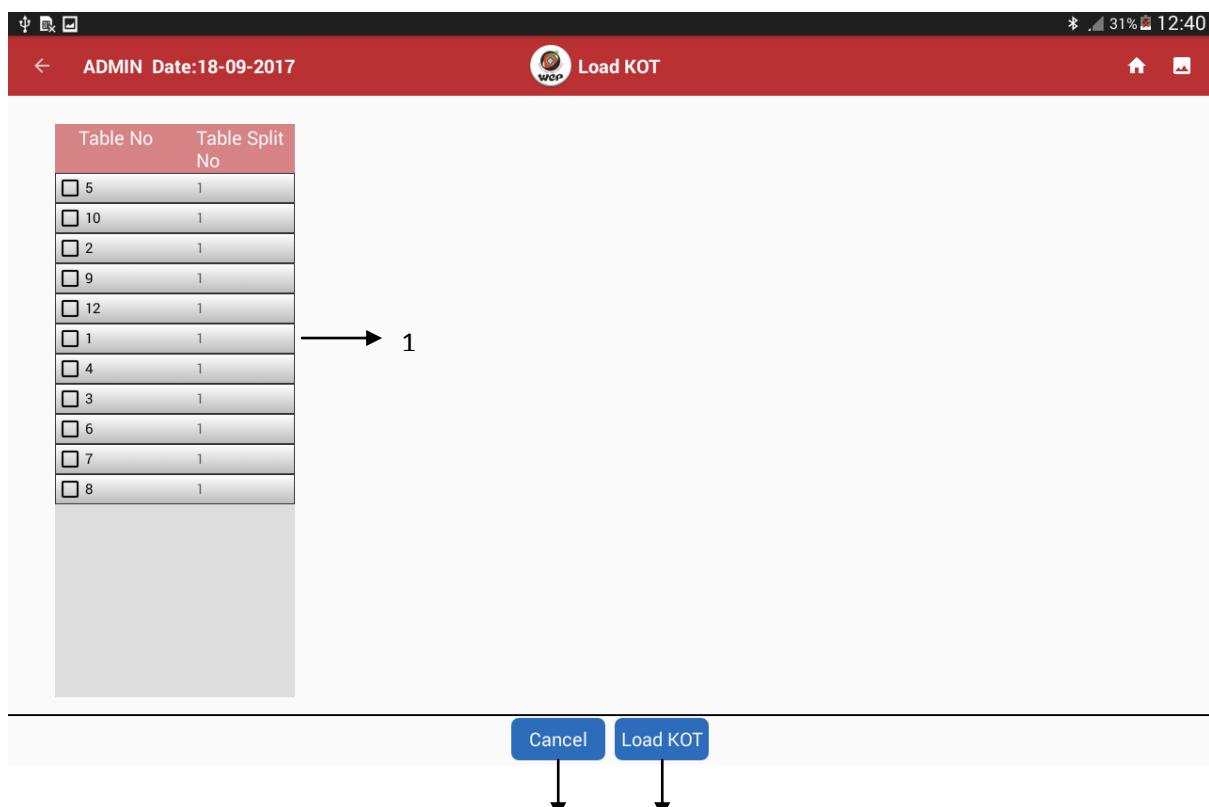

Figure 9: Load KOT

Label	Field	Description
1	List of Saved KOTs	List of KOTs.
2	Cancel	Closes the current screen.
3	Load KOT	Load KOT of selected table.

## WeP Solutions Limited

### 3.1.3.2 Modify KOT

Allows user to modify an already existing KOT.

1: Load KOT of a table

2: Click on button to modify the KOT

4: Now after making modification save KOT

3: Add new items or delete items

Figure 10: First load KOT of a table to modify.

### 3.1.3.3 Re Print KOT

To re-print a KOT user has to put Table number, split number if split is enabled and KOT number. There can be a case that multiple KOTs exists for one Table.

Table No	5
Table Split No.	3
KOT No.	76
CANCEL REPRINT	

Figure 11: Re-print KOT

WeP Solutions Limited

### 3.1.3.4 Shift Table

Allows user to shift existing KOT to a different table number.

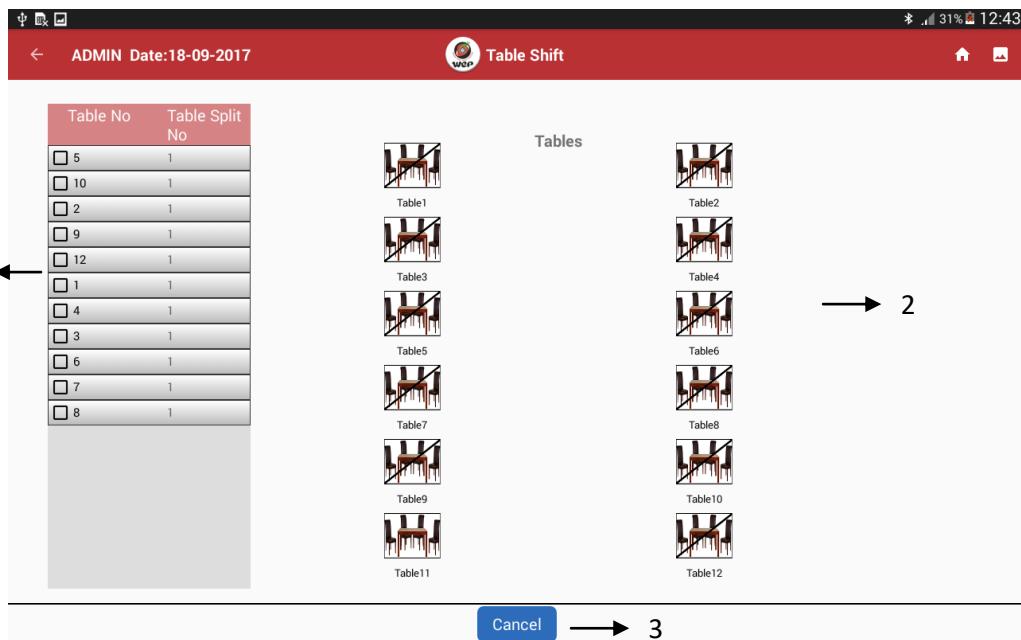

Figure 12: Shift Table w/o split

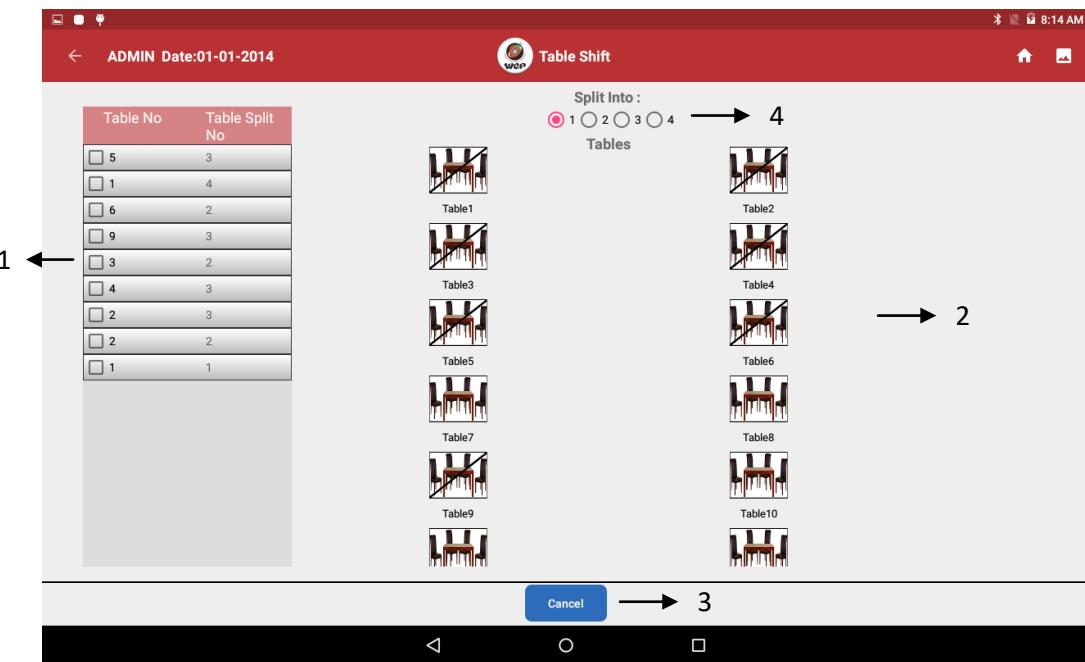

Figure 13: Shift Table w/ split

WeP Solutions Limited

<b>Label</b>	<b>Field</b>	<b>Description</b>
1	List of Tables	Select table for which you want to shift KOT.
2	Tables	Click on table to which you want to shift KOT.

4	Cancel	Closes the current screen.

## WeP Solutions Limited

### 3.2 Counter Sales

This module provides billing for counter sales service. Order can be made even without entering the customer details and without saving KOT.

**Figure 15 : Counter Sales**

Label	Field	Description
1	GSTIN	Customer's GSTIN.
2	Name*	Name of the customer.
3	Mobile number*	Customer's mobile number. User can also search his customer through his mobile number. If any record exists of the customer corresponding to that mobile number the data in fields 1, 2 and 4

### WeP Solutions Limited

		will automatically be populated.
4	Address	Address of the customer.
5	Add	If no customer record exists corresponding to the mobile number entered then user can add a new customer by clicking on the "Add" button after filling all the mandatory details of the customer.
6	Items List	User can choose items from the items list according to customer's choice.
7	Search Item Name	User can search for an item by its name.
8	Search Item Code	User can search for an item by its code.
9	Interstate	If user is supplying items out of the state, then he has to check the Interstate checkbox and select the state to which he is supplying his items. <i>Note: IGST will be applied.</i>
10	Order number	Shows which order number it is.
11	Kitchen Order Taken (KOT)	The list shows the selected items that customer wants to buy. Items can be added and removed from the list before printing/paying for the bill.
12	Print Bill	User can directly print the bill. Directly printing the bill will make payment mode by cash by default.
13	Pay bill	Provide various modes of payment. e.g.: credit card, e-Wallet.
14	Clear	Clear all the details and fields.
15	Delete Bill	Deletes the existing bill from the database by bill date and bill number. Deleting a bill requires manager's credentials. <a href="#">See details</a> in Section 3.4.3

### WeP Solutions Limited

16	Reprint Bill	User can reprint an existing bill by the date on bill that bill has been generated & the bill number. <a href="#">See details</a> in Section 3.4.4
17	Barcode Search	User can search for an item by its barcode.

\*Mandatory fields

### 3.3 Take Away

This module facilitates the billing for take away service. Here entering the customer details are mandatory.

The screenshot shows the 'Take Away' module interface with various input fields and a grid of food items:

- 1: Customer GSTIN: GSTIN
- 2: Customer Name: tia
- 3: Phone No.: 1234567890
- 4: Address: mg rd
- 5: Add button
- 6: Grid of food items (e.g., Aloo Baingan Masala, Butter Chicken, Chole Bhature, etc.)
- 7: Search Item Name
- 8: Search Item Code
- 9: Search Item Barcode
- 10: Order No.: 147
- 11: Item list table with columns: Name, HSN, Qty, Rate, Amount, Delete.
- 12: Save KOT button
- 13: Print & Save KOT button
- 14: Print Bill button
- 15: Pay Bill button
- 16: Clear button
- 17: Delete Bill button
- 18: Reprint Bill button
- 19: PickUp Status button
- 20: Taxable Value: 345.00
- 21: CGST-Tax: 23.10
- 22: SGST-Tax: 23.10
- 23: Date: 10-11-2017
- 24: TOTAL: 408.45

Figure 16 : Take Away

Label	Field	Description
1	GSTIN	Customer's GSTIN.

### WeP Solutions Limited

2	Name*	Name of the customer.
3	Mobile number*	Customer's mobile number. User can also search his customer through his mobile number. If any record exists of the customer corresponding to that mobile number the data in fields 1, 2 and 4 will automatically be populated.
4	Address	Address of the customer.
5	Add	If no customer record exists corresponding to the mobile number entered then user can add a new customer by clicking on the "Add" button after filling all the mandatory details of the customer.
6	Items List	User can choose items from the items list according to customer's choice.
7	Search Item Name	User can search for an item by its name.
8	Search Item Code	User can search for an item by its code.
9	Interstate	If user is supplying items out of the state then he has to check the Interstate checkbox and select the state to which he is supplying his items. <i>Note: IGST will be applied.</i>
10	Oder number	Shows which order number it is.
11	Kitchen Order Taken (KOT)	The list shows the selected items that customer wants to buy. Items can be added and removed from the list before paying for the bill.
12	Save KOT	Saves the KOT in database which can be modified before printing/paying the bill. This doesn't print the KOT.
13	Print/Save KOT	First saves the KOT in database and then prints it.

### WeP Solutions Limited

14	Print Bill	Bill can be printed only after saving the KOT. If KOT is not saved into the database print bill option will remain disabled. Directly printing bill is used when mode of payment is cash.
15	Pay Bill	Provides different modes of payment. e.g.: credit card, e-wallet. The option will remain disabled until KOT is not saved.
16	Clear	Clear all the details and fields.
17	Delete Bill	Deletes the existing bill from the database by bill date and bill number. Deleting a bill requires manager's credentials. <a href="#">See details</a> in Section 3.4.3
18	Reprint Bill	User can reprint an existing bill by the date on bill that bill has been generated & the bill number. <a href="#">See details</a> in Section 3.4.3
19	Pickup Status	Pickup status shows whether the order has been picked up by the customer or not. It also shows user whether the bill amount has been paid or not. After order has been placed user can see Customer Pending Orders in pickup status.  Print Bill that means mode of payment is cash and customer has picked up his order. Therefore this order will not appear in pickup status.  If PayBill is used to make payment (even cash), then those order will appear in pickup status.  If payment is not done then user can still modify/cancel the order. After payment has been done, user can confirm the pickup status by finishing the order. Once the order has been finished, it will be removed from customer pending orders.

WeP Solutions Limited

20	Barcode Search	User can search for an item by its barcode.
----	----------------	---

\*Mandatory fields

Note: After DayEnd whether auto or manual ([See Details](#)in Section 7) all KOTs will be cleared.

### 3.3.1 Pickup Status

Pickup Status screen shows whether the orders made in Take away service modules are picked up by the customers or not. If PrintBillis used, then it's assumed that payment is made by cash and order has been picked up, hence order will not display here. Else if Pay Bill was used, then it's assumed that order is yet to be picked and hence will be displayed here.

Even if payment is not made but order is made for the customer, it will be displayed here, with payment status: Not paid.

Figure 17 : Pickup Status

Label	Field	Description
1	Customer Pending order	List of customers, whose orders are yet to pick up.
2	Pending order details	KOT ordered by customer.
3	Customer Details	Details of the customer.
4	Modify Order*	Allows user to modify the order for the customer only if bill is not paid yet.
5	Pay bill	Allows user to make payment for the customer only if bill is not paid yet.
6	Cancel Order	User can cancel the order if its bill is not paid yet. But if bill is paid then cancelling the order will delete the bill.
7	Clear	Clear will clear all the fields.
8	Close	Closes the current screen.

Note:

1. Once bill amount is paid, user cannot modify the order but he will be provided with options to finish the order or to print the bill again.
2. The bill will be deleted if paid order is being cancelled.

## WeP Solutions Limited

### 3.4 Home Delivery

This module facilitates the billing for Home Delivery. Entering customer details is mandatory to make order.

The screenshot shows the WeP Solutions Limited Home Delivery application interface. At the top, there are input fields for Customer GSTIN (GSTIN), Customer Name (tia), Phone No. (1234567890), and Address (mg rd). Below these are search fields for Item Name, Item Code (with an Interstate checkbox and value Delhi 07), and Item Barcode, along with an Order No. (147). To the right is an 'Add' button. The main area displays a grid of food items with images and names: Aloo Baigan Masala, Aloo Gobi, Aloo Ki Tikki, Aloo Matar, Aloo Methi, Aloo Shimla Mirch, Amriti with Rabdi, Amritsari Fish, Chai, Chaach, Bhindi Masala, Biryani, Butter Chicken, Chaat, Chana Masala, Chapati, Chicken Razala, Chicken Tikka, Chole Bhature, Daal Baati Churma, Daal Puri, Dal Makhani (Kali), and Dal Fara. At the bottom, there are buttons for Save KOT, Print & Save KOT, Print Bill, Pay Bill, Clear, Delete Bill, Reprint Bill, and Delivery Status. A legend at the bottom maps numbered arrows to these buttons: 12 (Save KOT), 13 (Print & Save KOT), 14 (Print Bill), 15 (Pay Bill), 16 (Clear), 17 (Delete Bill), 18 (Reprint Bill), and 19 (Delivery Status).

Figure 18 : Home Delivery

Label	Field	Description
1	GSTIN	Customer's GSTIN.
2	Name*	Name of the customer.
3	Mobile number*	Customer's mobile number. User can also search his customer through his mobile number. If any record exists of the customer corresponding to that mobile number the data in fields 1, 2 and 4 will automatically be populated.

### WeP Solutions Limited

4	Address	Address of the customer.
5	Add	If no customer record exists corresponding to the mobile number entered then user can add a new customer by clicking on the "Add" button after filling all the mandatory details of the customer.
6	Items List	User can choose items from the items list according to customer's choice.
7	Search Item Name	User can search for an item by its name.
8	Search Item Code	User can search for an item by its code.
9	Interstate	If user is supplying items out of the state then he has to check the Interstate checkbox and select the state to which he is supplying his items. <i>Note: IGST will be applied.</i>
10	Oder number	Shows which order number it is.
11	Kitchen Order Taken (KOT)	The list shows the selected items that customer wants to buy. Items can be added and removed from the list before paying for the bill.
12	Save KOT	Saves the KOT in database which can be modified before printing/paying the bill.
13	Print/Save KOT	First saves the KOT in database and then sends a print command to the printer to print the KOT.
14	Print Bill	Bill can be printed only after saving the KOT. If KOT is not saved into the database print bill option will remain disabled. Directly printing the bill will make payment mode by cash by default.
15	Pay Bill	Provides different modes of payment. e.g.: credit card, e-wallet. The option will remain disabled until KOT is not saved.

### WeP Solutions Limited

16	Clear	Clear all the details and fields.
17	Delete Bill	Deletes the existing bill from the database by bill date and bill number. Deleting a bill requires manager's credentials. <a href="#">See details</a> in Section 3.4.3
18	Reprint Bill	User can reprint an existing bill by the date on bill that bill has been generated & the bill number. <a href="#">See details</a> in Section 3.4.4
19	Deliver Status	Once KOT is saved user can see customer pending orders in deliver status where he can assign a rider for that order who is going to deliver the order.  If payment is done then the amount due will be 0.  If payment is not done then the amount due will be the bill amount.  Once the rider has been assigned then user can update the order delivery status from "COD Settlement" by updating the amount that that rider has received from the customer.
20	Barcode Search	User can search for an item by its barcode.

\*Mandatory fields

Note:

1. Unless COD settlement is made for the bill, a bill details won't be reflected in reports.
2. After DayEnd whether auto or manual ([See Details](#) in Section 7) all KOTs will be cleared.

### WeP Solutions Limited

#### 3.4.1 Delivery Status

Here list of order to get delivered are displayed. After clicking on the order, its details are displayed along with the customer details, for which the order is made. Payment status is also displayed as Paid or Cash on Delivery. Rider is assigned for home delivery of order and later COD settlement is made.

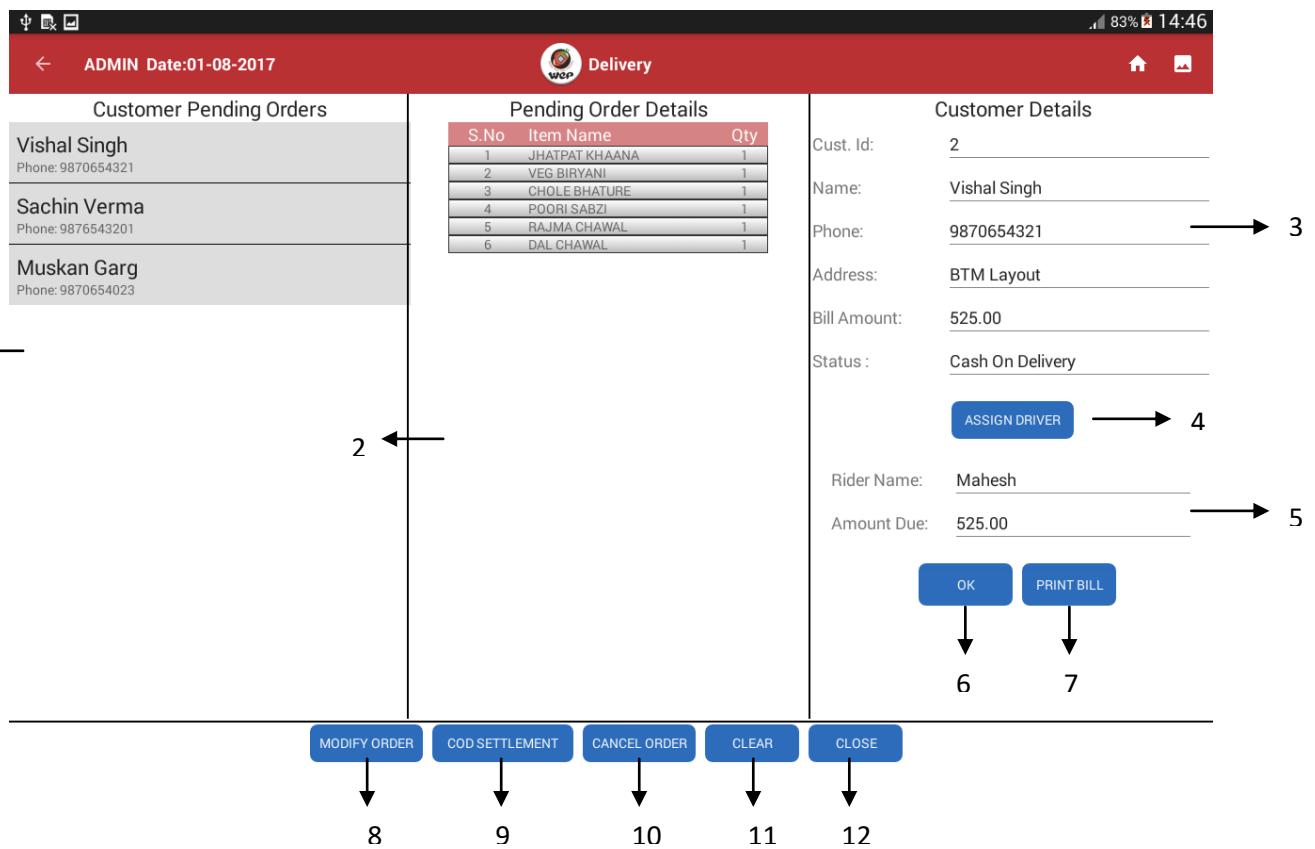

Figure 19 : Home Delivery Status

Label	Field	Description
1	Customer Pending order	List of customers whose orders are pending or home delivery.
2	Pending order details	KOT ordered by customers.
3	Customer Details	Details of the customer.
4	Assign Rider	Allows user to see a list of all the riders and

### WeP Solutions Limited

		choose one of them in order to assign delivery of order.
5	Rider details	Details of the rider.
6	Ok	Allows user to assign the rider for that order.
7	Print Bill	Print the bill.
8	Modify Order	Allows user to modify the order for the customer if bill is not paid yet.
9	COD Settlement	Allows user to update the due amount once rider come back after delivering the order.
10	Cancel Order	User can cancel the order if its bill is not paid yet.
11	Clear	Clear will clear all the fields.
12	Close	Closes the current screen.

Note:

1. Once bill amount is paid, user cannot modify the order.
2. The bill will be deleted if paid order is being cancelled.

WeP Solutions Limited

### 3.5 Making Payments

Label	Field	Description
1	Total	Total amount to be paid by customer.
2	Round off	Rounded off value (Only if round off is enabled in settings. <a href="#">See Details</a> in Section 3.6.4.9)
3	Cash	Amount paid in cash by customer.
4	Other cards	Amount paid by card other than MSwipe machine.
5	Paid Total	Total amount paid by customer.
6	Difference	Balance amount. Positive sign reflects, due amount to be received from customer, whereas negative sign depicts return amount to be given to

### WeP Solutions Limited

		customer.
7	Petty Cash	Amount paid by credit customer.
8	Discount	Applied discount amount.
9	Coupon	Applied coupon amount.
10	Wallet	Amount paid through e-wallets.
11	MSwipe Card	Amount paid by MSwipe card.
12	MSwipe Payment	Payments through cards via MSwipe machine. To avail this, user should be enrolled on mSwipe website for credentials. ( <a href="#">See Details</a> in Section 3.5.1)
13	Wallet Payment	Payments through e-wallets. To avail this mode, user is required to register with Razor pay on their website to get Key Id & Secret Key. These credentials can be configured in Payment mode configuration module. ( <a href="#">See Details</a> in Section 3.7.5).
14	Credit Customer	To make payment through credit amount of that customer.
15	Discount	To apply discount that is configured in configuration. <a href="#">See Details</a> in Section 3.7.1.5.
16	Coupon	To apply coupons which are configured in configuration. <a href="#">See Details</a> in Section 3.7.1.6.
17	Save	Save the bill without print.
18	Save & Print	To save and print the bill.

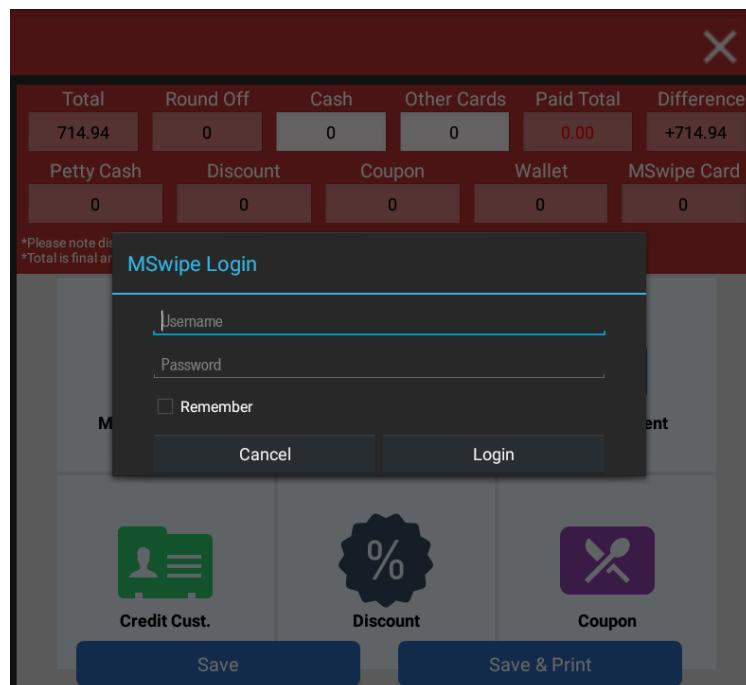

WeP Solutions Limited

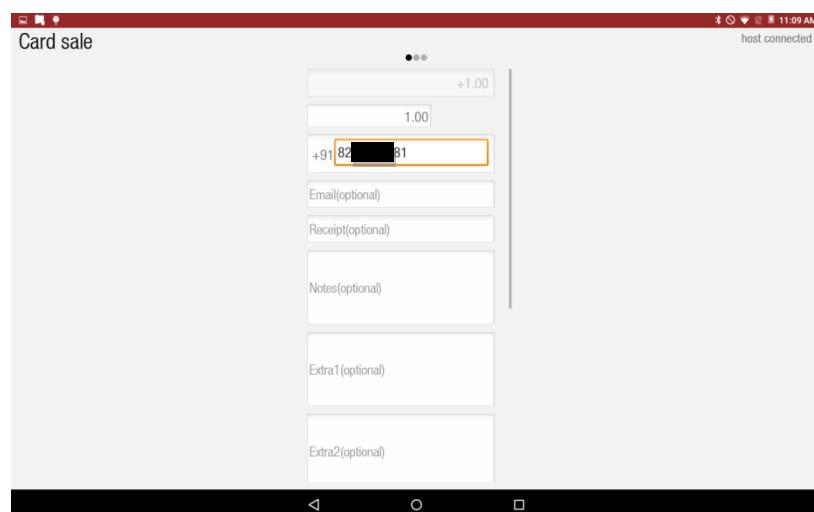

### 3.5.1 MSwipe Payments

To make payments through cards user should be enrolled on MSwipe website to get credentials. To register [Click Here](#) or visit <http://www.mswipe.com/>

Kindly turn on device's Wi-Fi to process the transaction and Bluetooth to connect to MSwipe machine.

**Figure 24: Once you get your login credentials, use them to login**

**Figure 25: Enter customer's mobile no. as it is mandatory, then scroll down and click on next**

WeP Solutions Limited

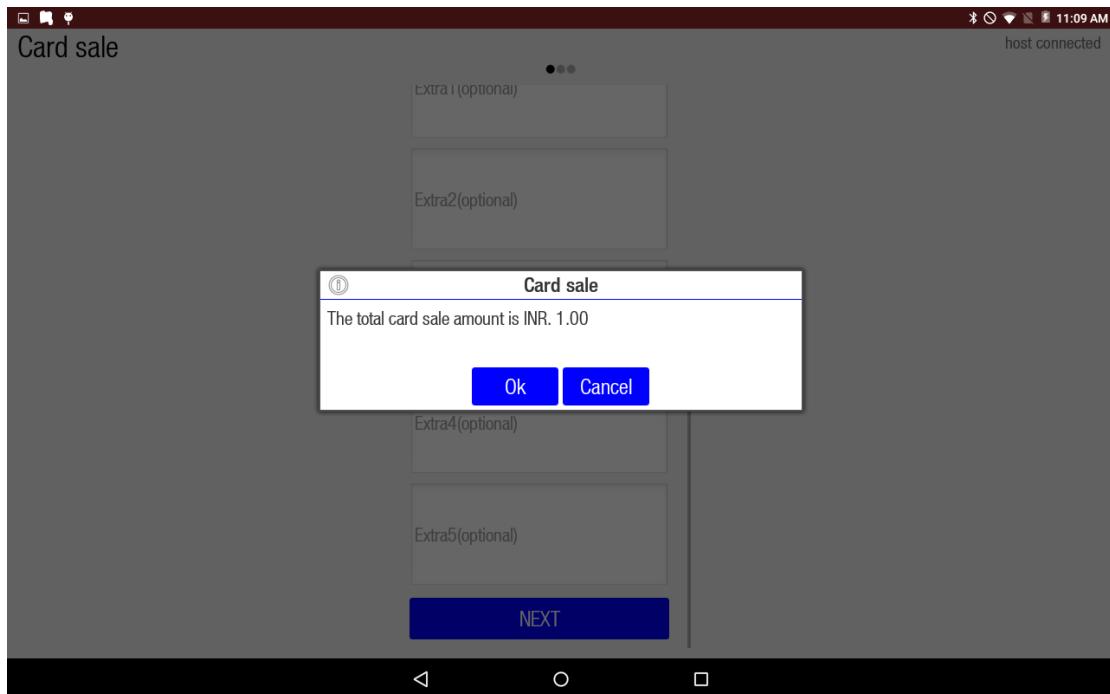

Figure 26: Confirm the amount and then click on OK

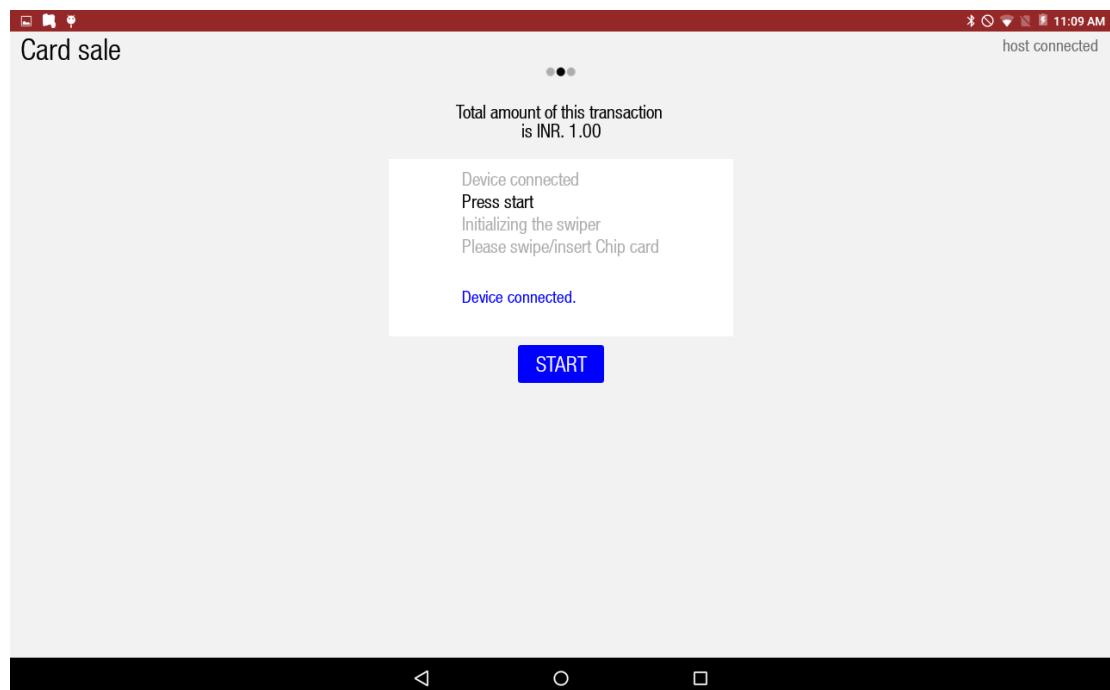

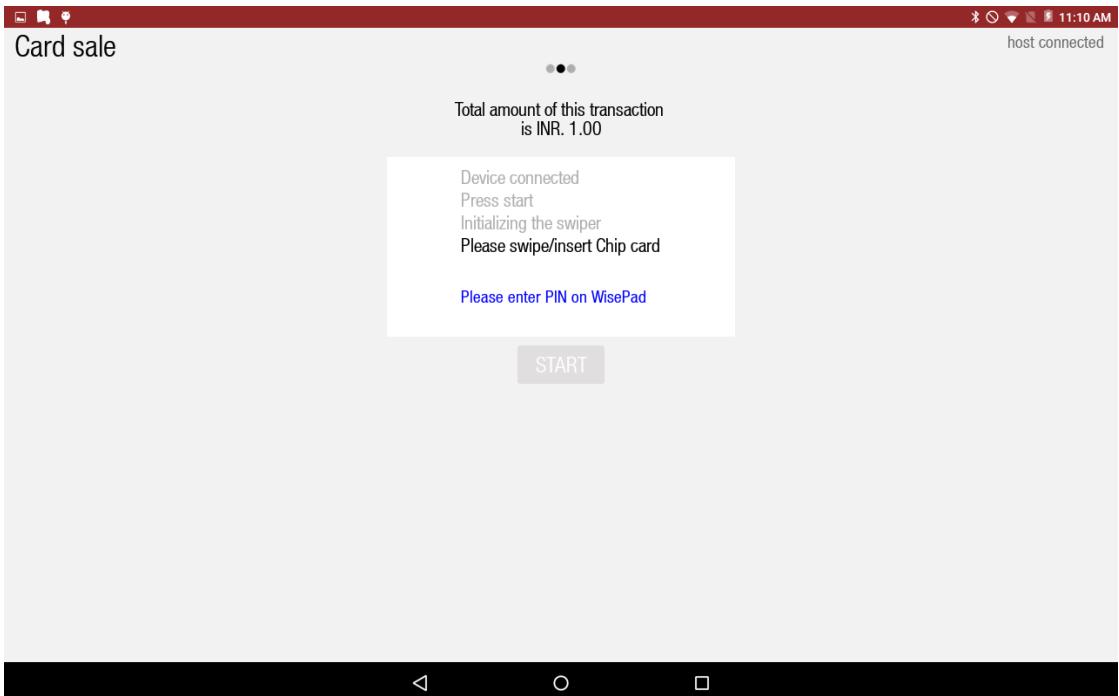

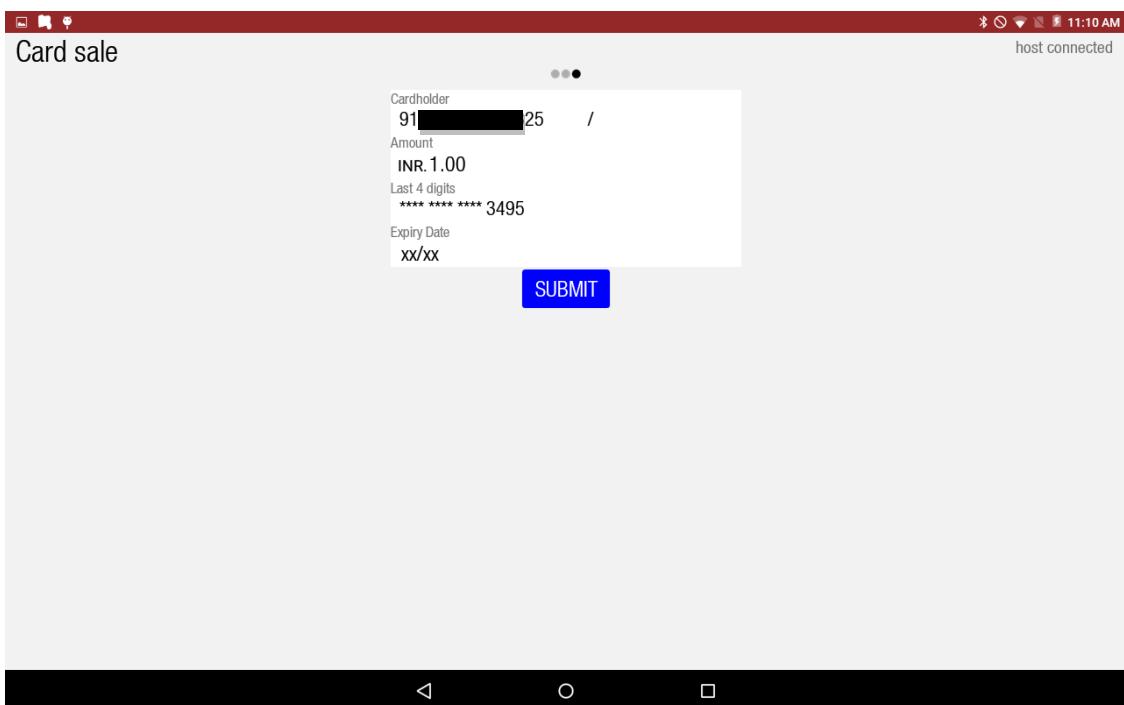

Figure 27: Connect MSwipe Machine via Bluetooth (if not already) and click on start to initiate the transaction

## WeP Solutions Limited

**Figure 28:** Once the application detects the machine it will ask user to insert or swipe the card

**Figure 29:** After swiping and entering the PIN click on Submit

## WeP Solutions Limited

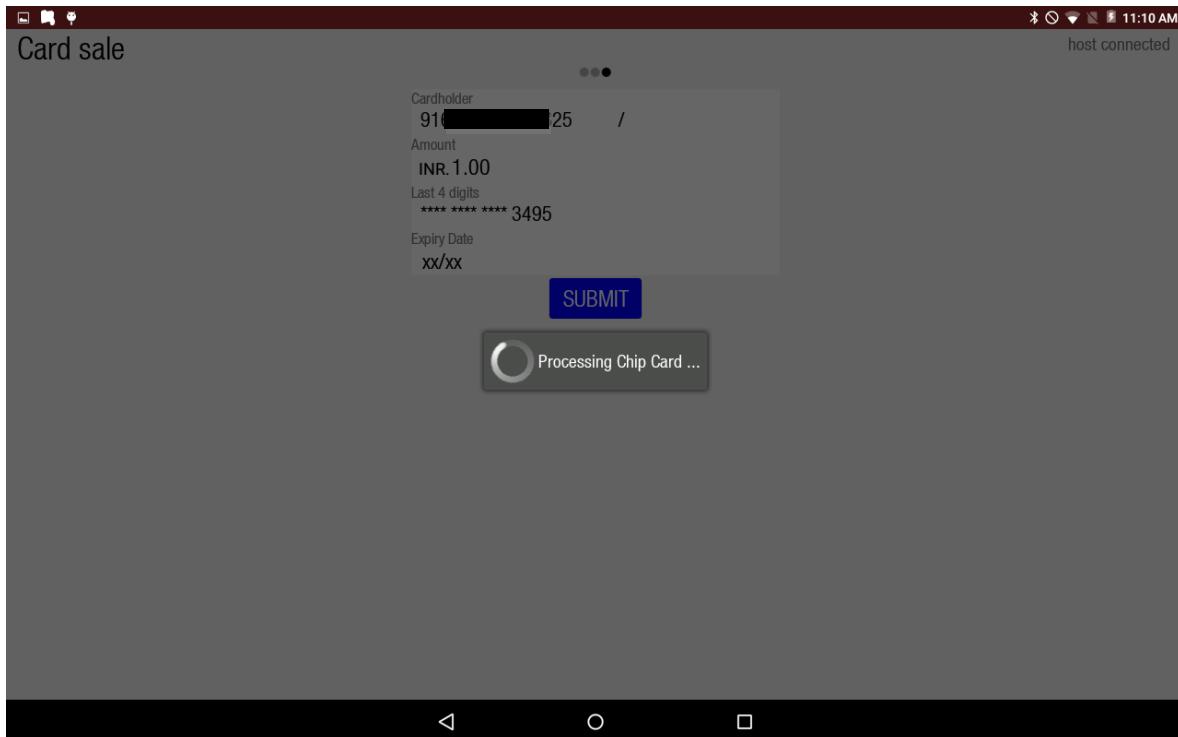

Figure 30: Verification of credentials will happen

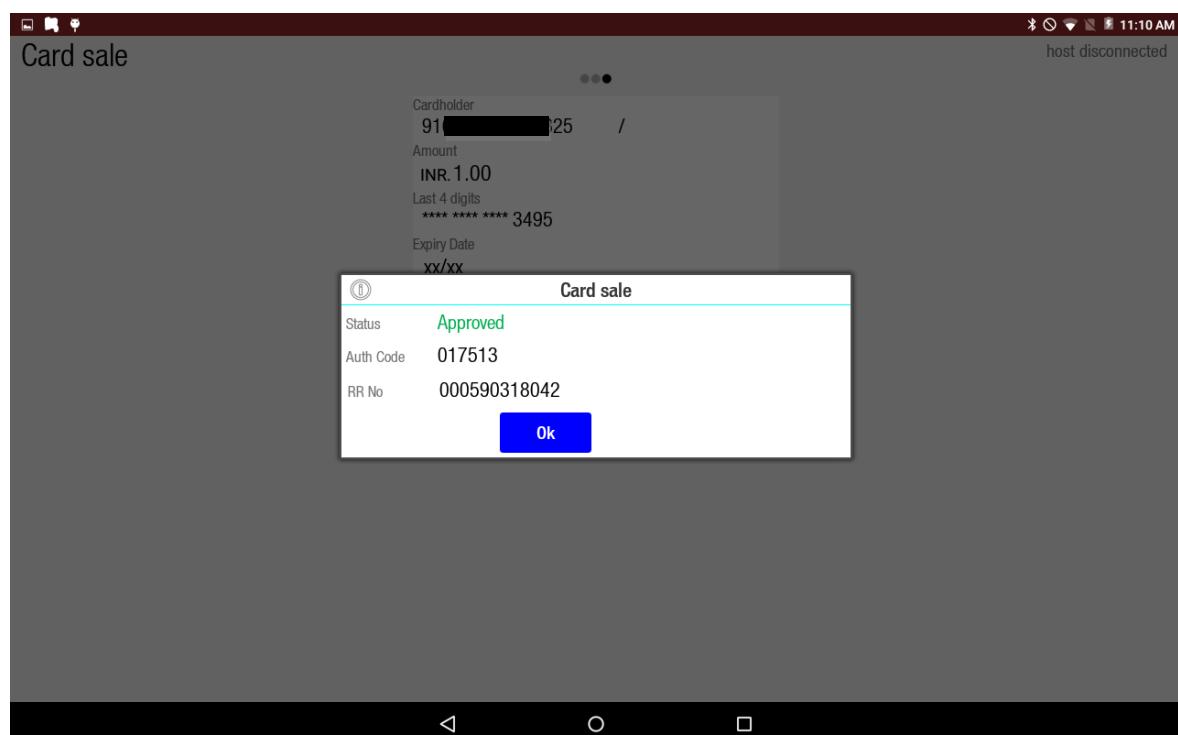

Figure 31: A message will pop up for transaction status as success or failed

## WeP Solutions Limited

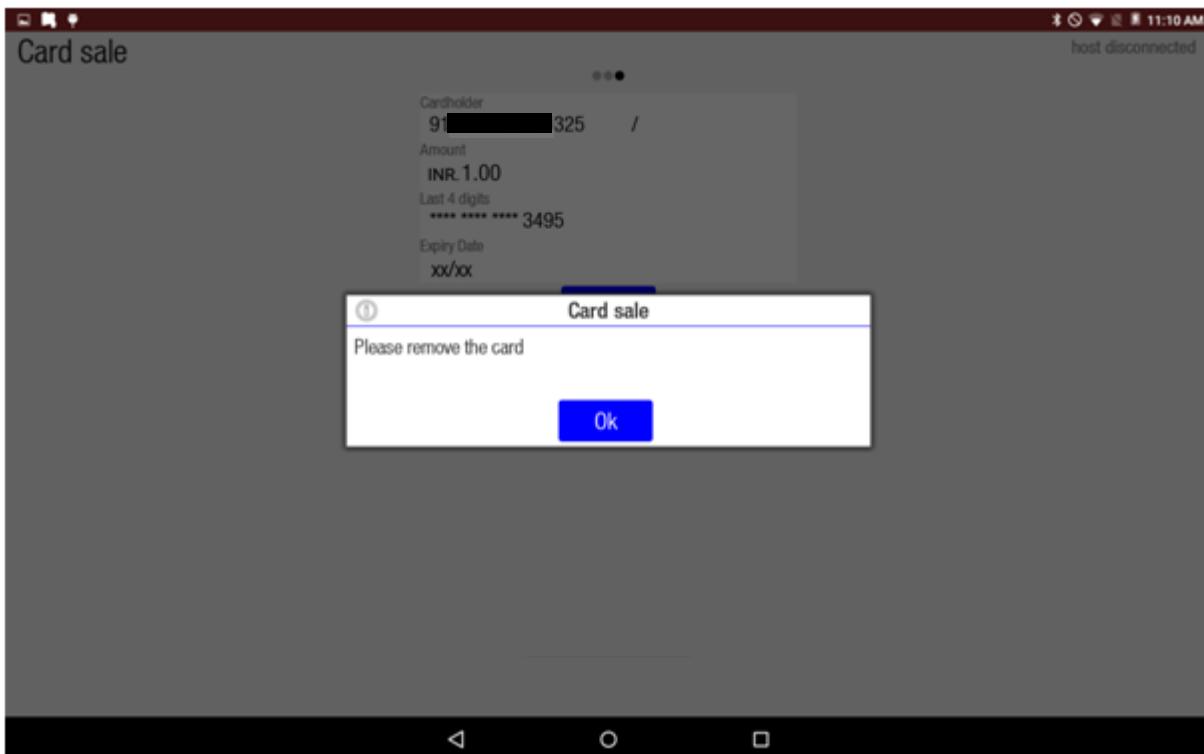

Figure 32: Remove the card once transaction is done

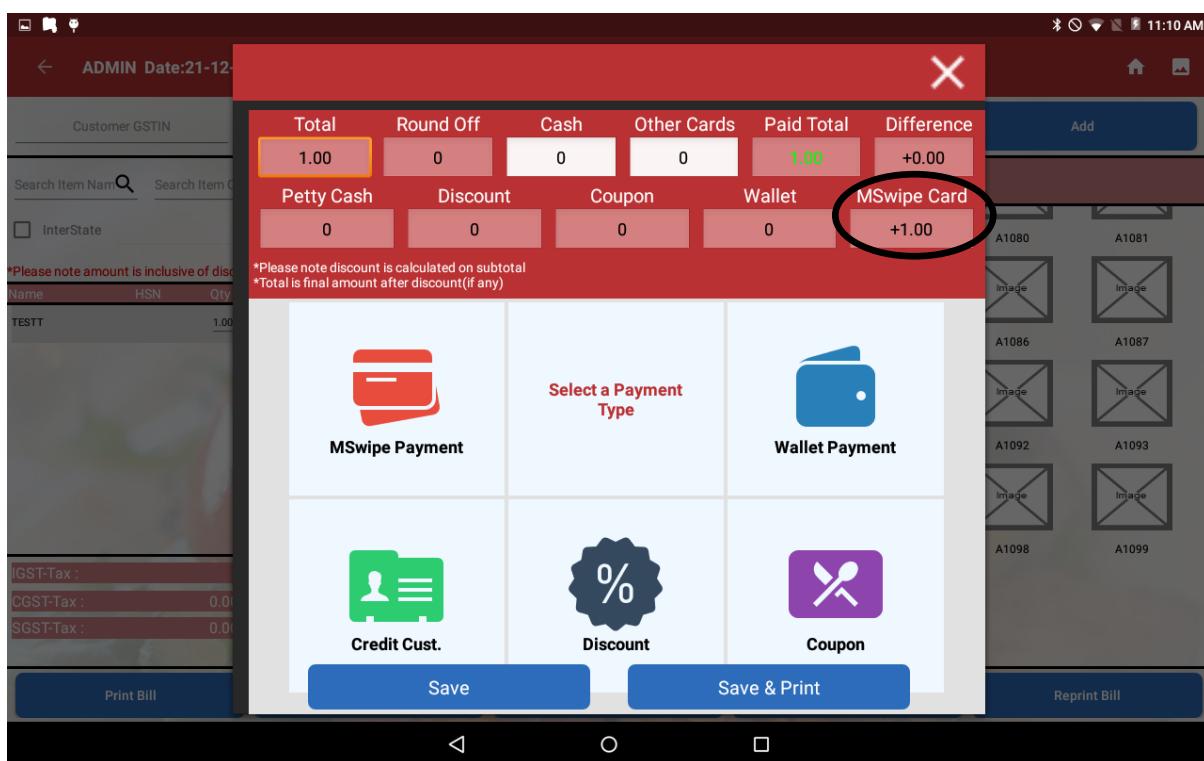

Figure 33: Paid amount by MSwipe will be shown in payment screen

WeP Solutions Limited

### 3.5.2 Wallet Payments

For making e-wallet payments user needs to configure Razor Pay Key id([See details](#) in Section 3.7.5).To get Key id user needs to register on Razor Pay website, to register [Click Here](#) or visit <https://razorpay.com/>.Kindly note that valid key id is compulsory to configure, secret key is optional. Once user has configured a valid key id provided by Razor Pay, then connect the device to Wi-Fi and follow the following steps:-

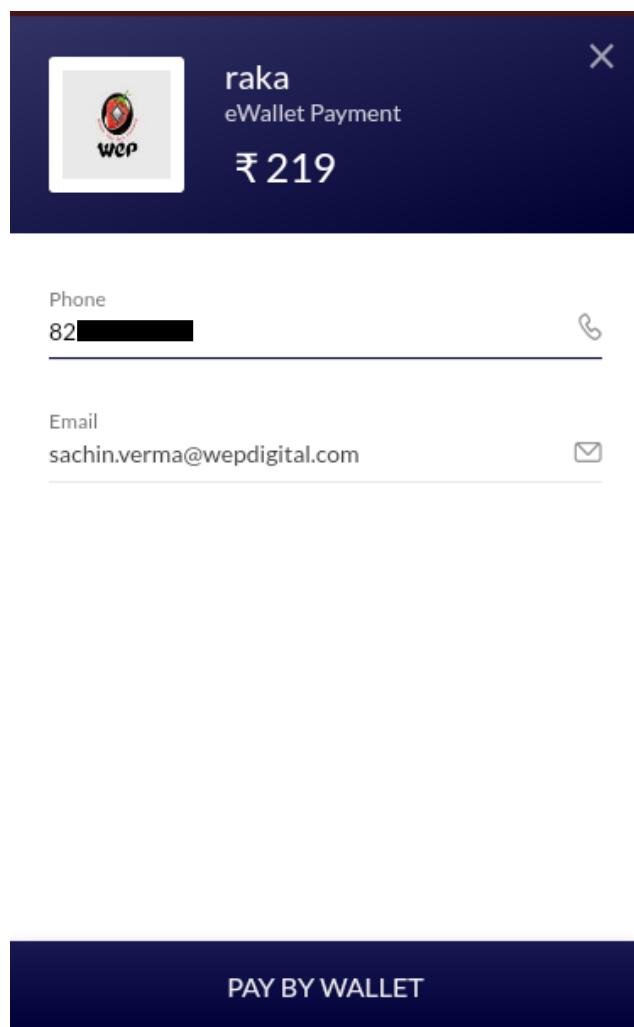

Figure 34: 1. Click on wallet payment and enter customer's details phone no & email

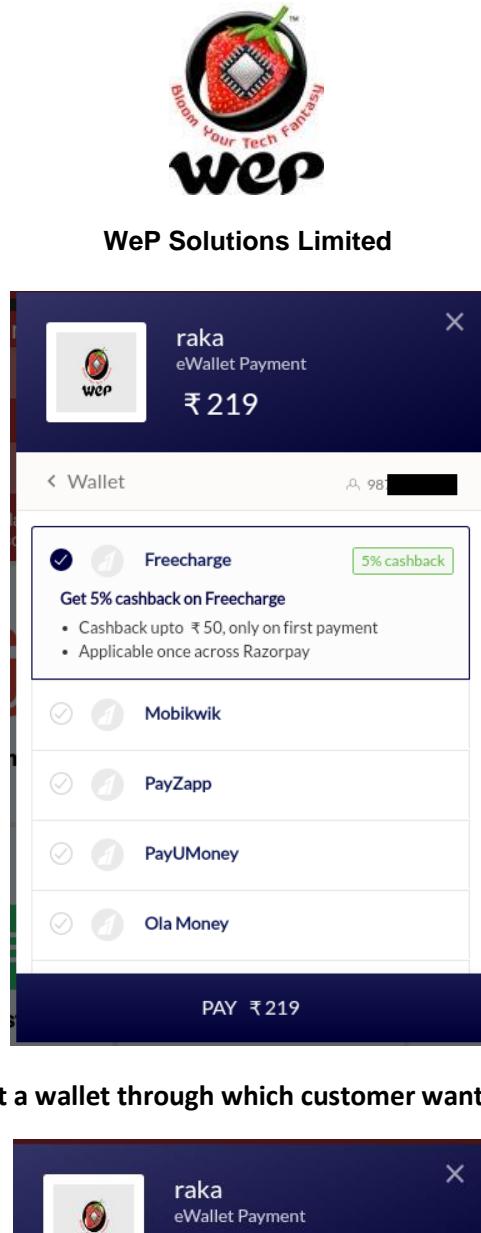

Figure 35: 2. Select a wallet through which customer wants to make payment

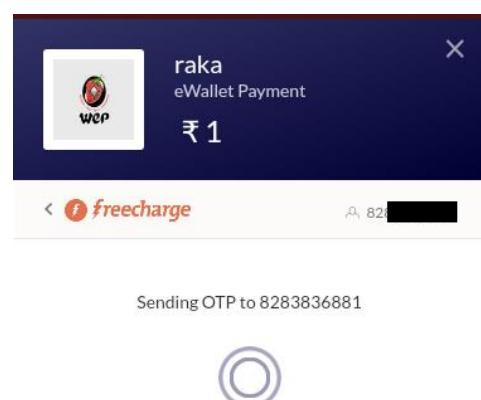

Figure 36: 3. OTP will be sent to entered mobile number

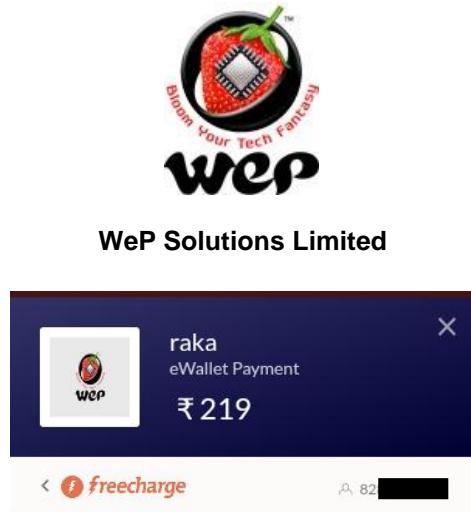

Figure 37: 4. Enter the received OTP

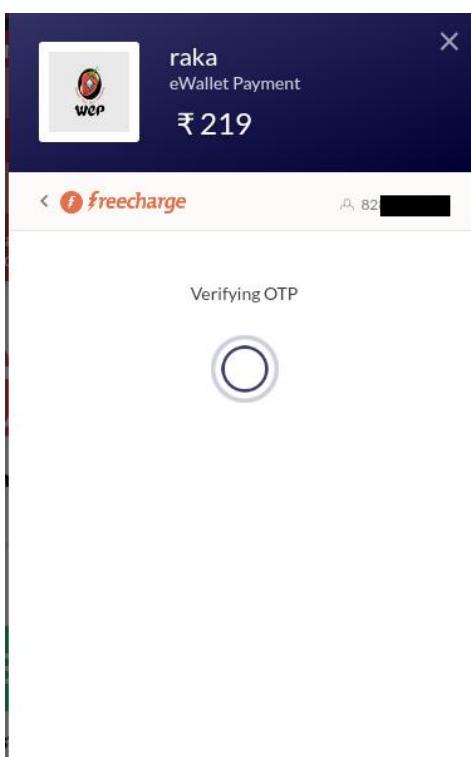

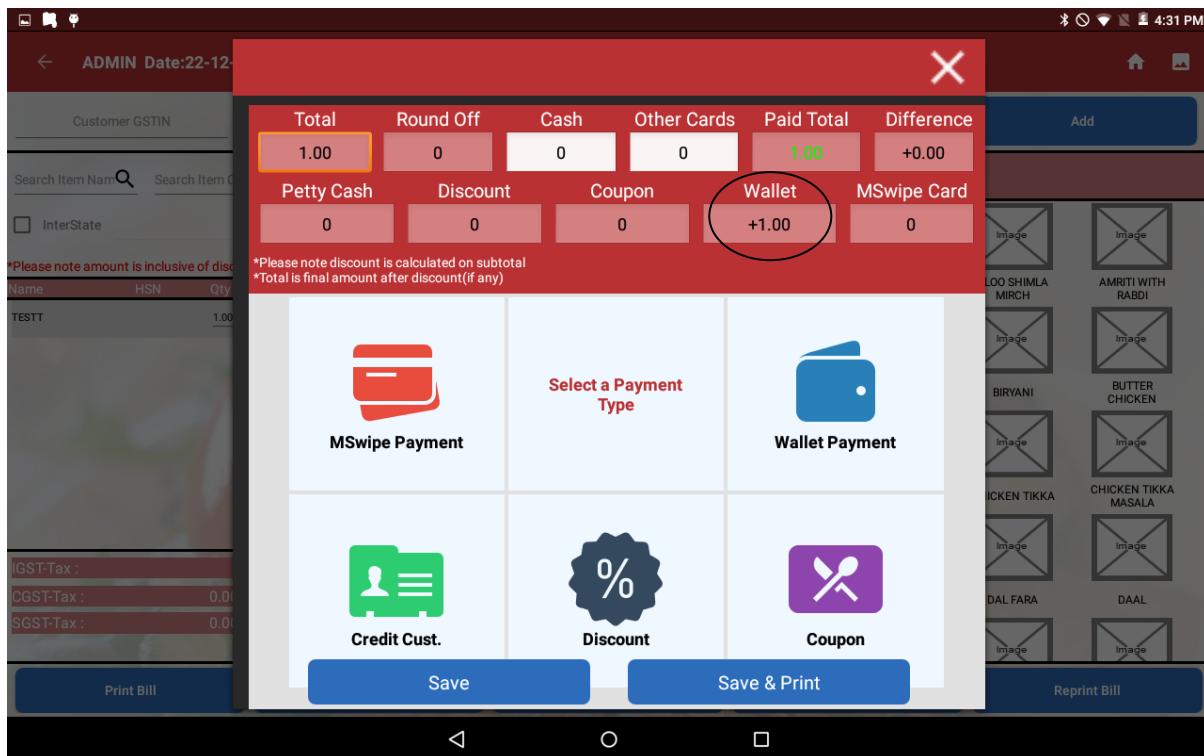

Figure 38: 5. After OTP verification, amount will be deducted from customer's e-Wallet

WeP Solutions Limited

**Figure 39: After paying through e-Wallet, amount will display on payment screen**

### 3.5.3 Credit Customer

For using credit customer payment, user has to add customer with credit limit and credit amount ([See Details](#) in Section 3.7.8).

Now follow the following steps to make payment by credit customer:-

(wep)
Credit Customer

Mobile No :	<input type="text" value="98"/>
Name :	Sachin Verma
Credit Amount :	9000.00
Credit Limit :	5000.00
Amount to Pay :	238.90

Balance After Payment: 9000.00-238.90=8761.10

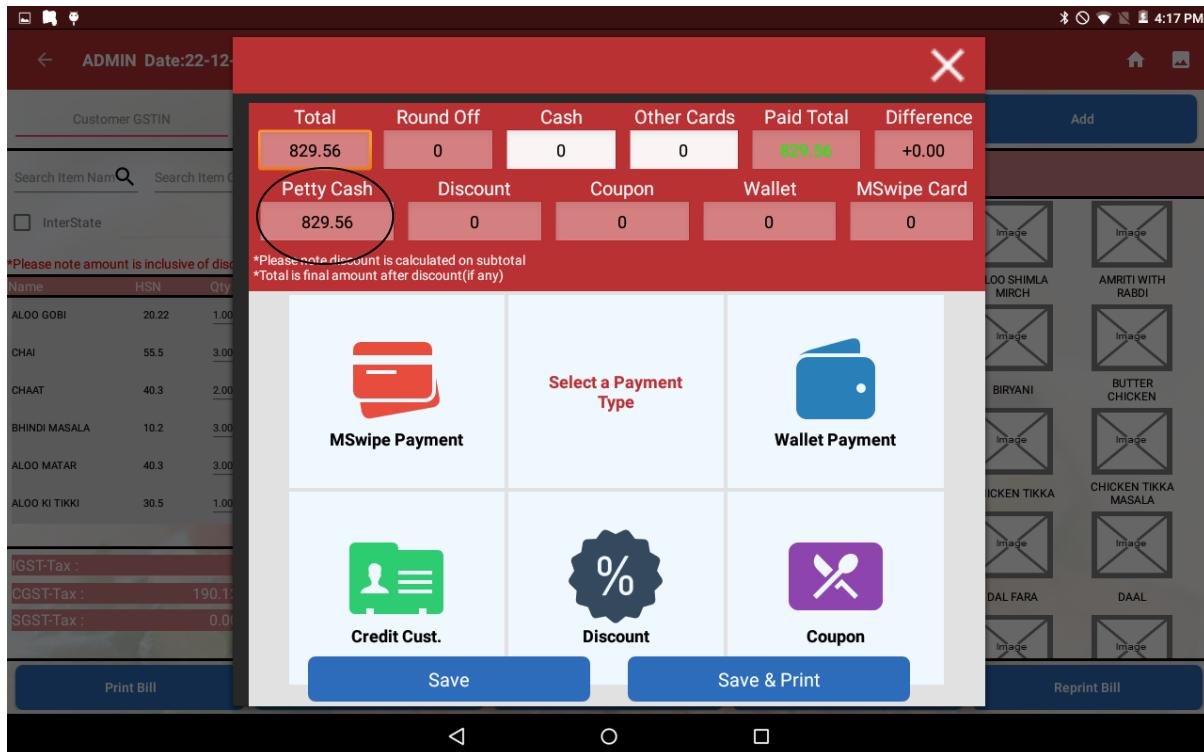

Cancel
Credit & Pay

**Figure 40: Enter customer's mobile no. and click on credit and pay**

## WeP Solutions Limited

The amount will automatically be deducted from customer's credit amount.

**Figure 41: After payment is made, the paid amount will be shown in Petty Cash**

### 3.5.3.1 If credit amount is less than the amount to pay

In case the amount to be pay by customer is more than the customer's credit amount than customer can make partial payment as well. For example:-

Amount to pay = ₹ 800

Customer's Credit Amount = ₹200

Customer's Credit Limit = ₹300

Then Amount to pay –(Credit's Customer Amount + Credit's Credit Limit) = ₹ 300, now due amount of ₹ 300 can be paid by any other mode of payment.

WeP Solutions Limited

Mobile No :	98
Name :	Sachin Verma
Credit Amount :	200.00
Credit Limit :	300.00
Amount to Pay :	1439.62
Maximum allowed payment :	500.00

Your Credit Balance Amount is less than Payable Amount.  
You can Pay by Credit or Other Mode.

**Cancel**      **Pay Partially**

**Figure 42: Enter customer's mobile no. and click on pay partially**

### 3.5.4 Discount

User can apply discount on bill amount generated and these discounts can be configured in configuration. [See Details](#) in Section 3.7.1.5.

Note: Please note discount is calculated on subtotal.

S.No	Description	Percent
1	Christmas	12
M2	New Year 2018	18

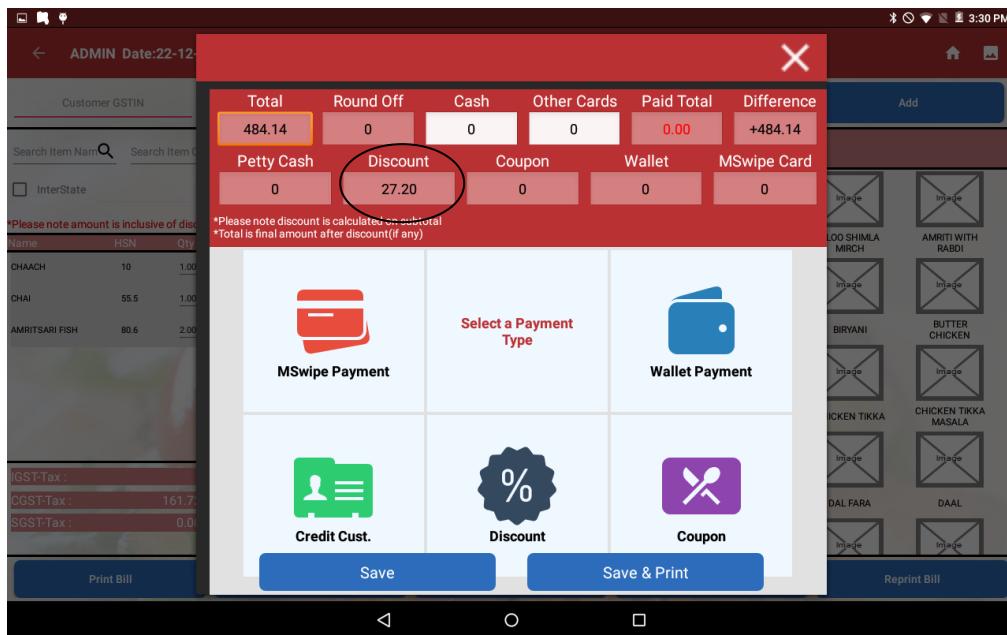

**Credit Cust.**      **Discount**      **Coupon**

**Save**      **Save & Print**

**Figure 43: Click on discount you want to apply.**

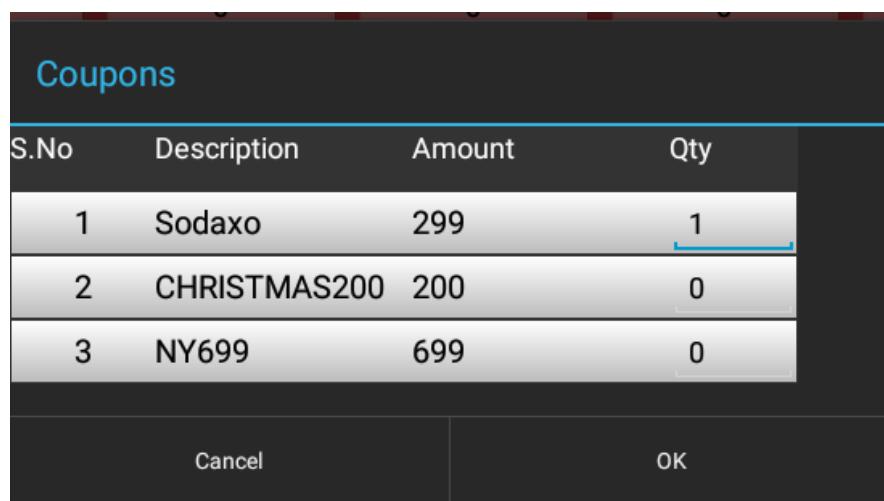

WeP Solutions Limited

**Figure 44:** After applying discount, the discounted amount is display.

### 3.5.5 Coupon

User can apply coupons on bill amount. User has to configure coupons in configuration. [See Details](#) in Section 3.7.1.6. User can apply more one coupon.

**Figure 45:** Enter the count and click on ok to apply coupon

## WeP Solutions Limited

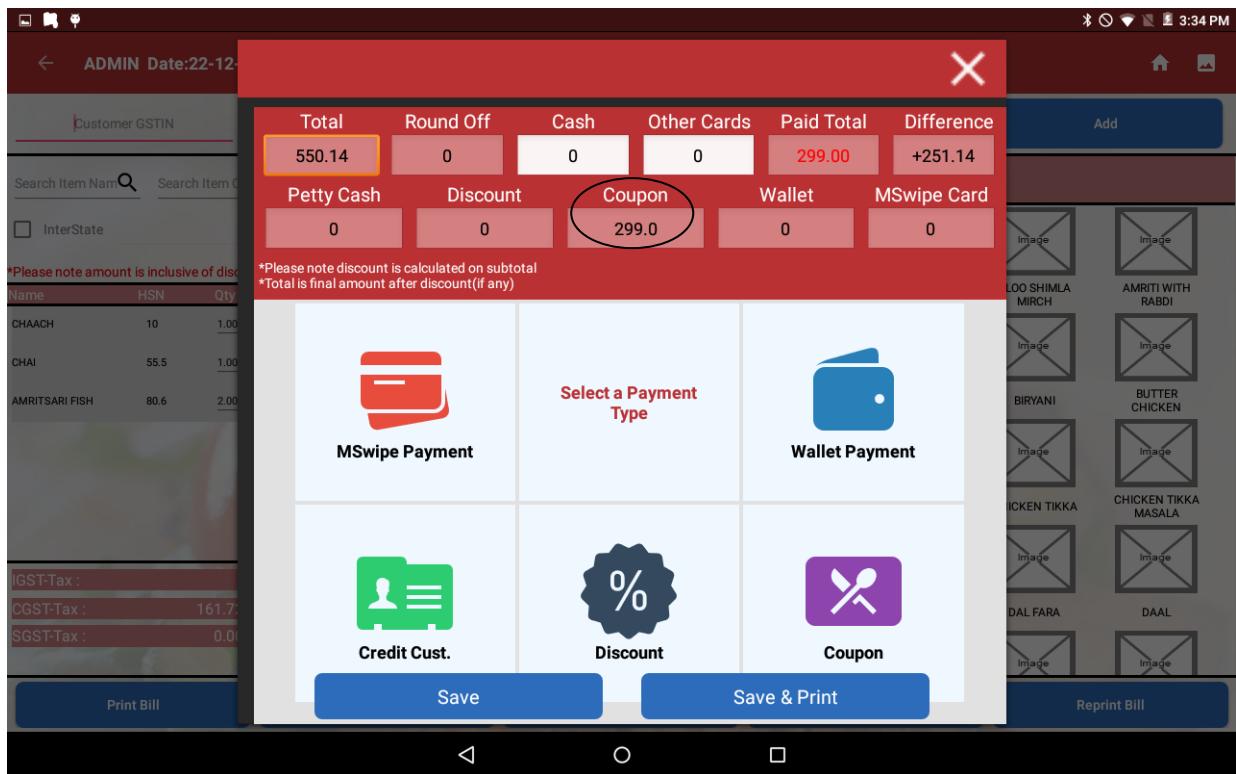

Figure 46: After applying coupon, coupon amount is displayed.

WeP Solutions Limited

### 3.6 Payment/Receipt

This module provides mechanism to enter expenses like electricity bill, water bill, etc.

The screenshot shows a mobile application interface for managing payments and receipts. At the top, there is a red header bar with the text "ADMIN Date:31-07-2017" on the left and "Payment/Receipt" in the center. On the right side of the header are icons for home, back, and search. Below the header, the main content area has the following fields:

- 1**: A radio button labeled "Payment" (selected) and "Receipt".
- 2**: A text input field labeled "Date" containing "28-07-2017", with a calendar icon to its right.
- 3**: A text input field labeled "Description" containing "electricity", with a dropdown arrow to its right.
- 4**: A text input field labeled "Reason" containing "electricity bill".
- 5**: A text input field labeled "Amount" containing "1200".

At the bottom of the screen, there are three blue buttons: "Save", "Clear", and "Close". Arrows below these buttons point downwards to numbered labels 6, 7, and 8 respectively.

Figure 47: Payment & Receipt

Label	Field	Description
1	Payment/Receipt	User can choose whether he is making an entry for a payment or receipt.
2	Date	Allows user to choose a date on which payment/receipt was made.
3	Description	Description for the payment/receipt. Descriptions can be configured. <a href="#">See Details</a> in Section 3.6.1.4.
4	Reason	Reason for making payment/receipt.
5	Amount	The amount paid for payment/receipt.

WeP Solutions Limited

### 3.7 Masters

Masters Screen provides mechanism to access modules.

Figure 48: Master Screen

#### 3.7.1 Configuration Screen

Configuration screen allows user to configure the application by providing few options that will help him a lot to manage many things.

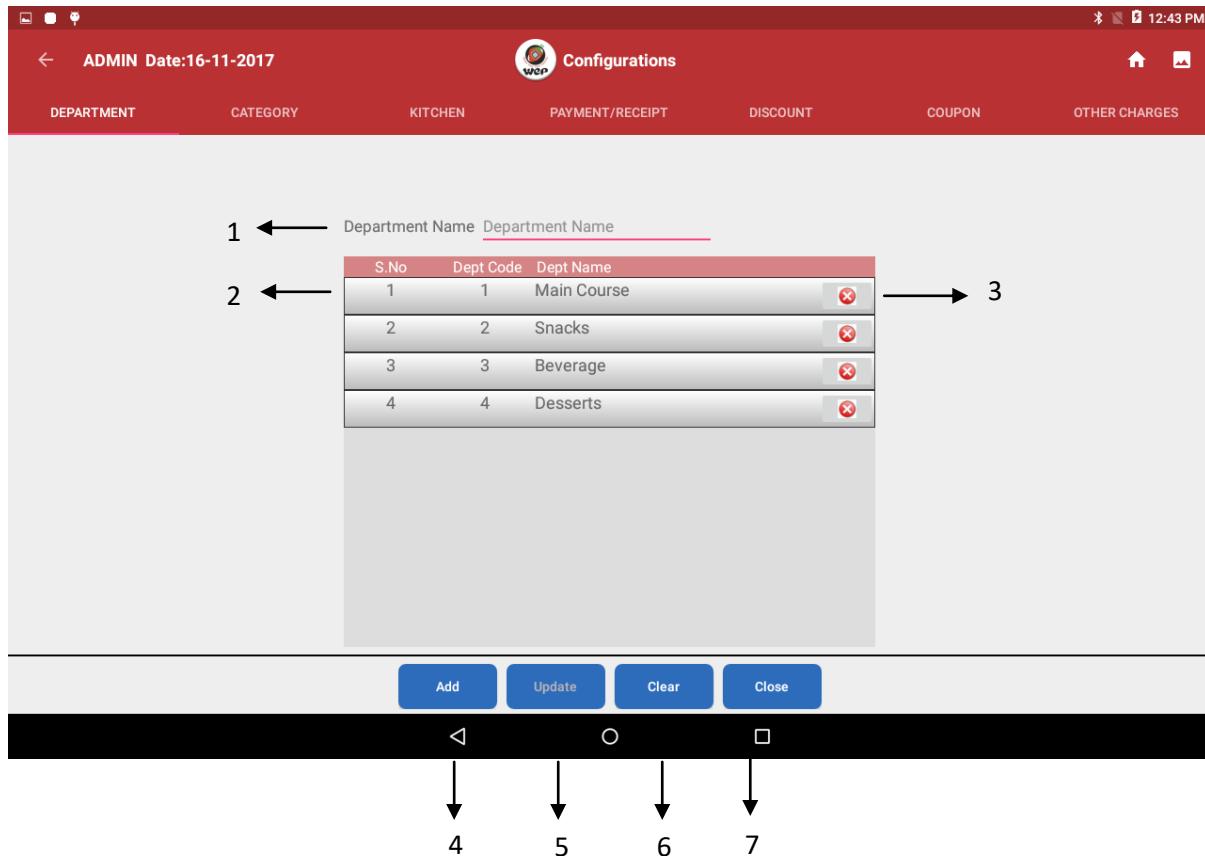

- User can manage by categorizing food items and beverages under department and category.
- It allows user to configure kitchens.
- User can configure various Payments/Receipts in an organized manner.
- Discounts & Coupons can be configured and availed to the customer at the time of billing.
- User can also add “**Othercharges**” which are customizable and applicable while billing.

### WeP Solutions Limited

#### 3.7.1.1 Department

A restaurant can have multiple departments according to what type of food & beverages they are providing. e.g.: Beverages, Main Course.

**Figure 49: Department Configuration**

Label	Field	Description
1	Department name	Name of the department user wants to add.
2	Department List	List of the departments.
3	Delete	Delete department from the list.
4	Add	Button to add new department name into database.
5	Update	Update details of an existing department.

### WeP Solutions Limited

6	Clear	Clears all the fields.
7	Close	Closes the current screen.

#### 3.7.1.2 Category

User can categorize the items in their own way. e.g.: a restaurant has a department which take care of beverages. Now beverages can be categorized into “Soft Drinks” & “Alcohol”.

The screenshot shows a mobile application interface for 'Configurations'. At the top, there are tabs for 'DEPARTMENT', 'CATEGORY', 'KITCHEN', 'PAYMENT/RECEIPT', 'DISCOUNT', 'COUPON', and 'OTHER CHARGES'. The 'CATEGORY' tab is selected. The main area displays a table of categories:

S.No	Categ Code	Categ Name	Dept Name
1	1	Soft drinks	Beverage
2	2	Alcohol	Beverage
3	3	Dry	Main Course
4	4	Cury	Main Course

Below the table are four buttons: 'Add', 'Update', 'Clear', and 'Close'. A black bar at the bottom contains navigation icons: a left arrow, a circle, and a square. Numbered callouts point to specific elements:

- 1: Points to the 'Department Name: Select' dropdown.
- 2: Points to the table header.
- 3: Points to the 'Delete' icon in the top right corner of the table.
- 4: Points to the 'Add' button.
- 5: Points to the 'Update' button.
- 6: Points to the 'Clear' button.
- 7: Points to the 'Close' button.

Figure 50: Category Configuration

Label	Field	Description
1	Category name	Name of the Category user wants to add.
2	Category List	List of the Category.
3	Delete	Delete Category from the list.
4	Add	Button to add new Category name into database.

### WeP Solutions Limited

5	Update	Update details of an existing Category.
6	Clear	Clear will clear all the fields.
7	Close	Closes the current screen.

#### 3.7.1.3 Kitchen

User can configure different types of kitchens; they have in their restaurants. e.g.: A kitchen where vegetarian food is prepared and a kitchen where non-vegetarian food is prepared.

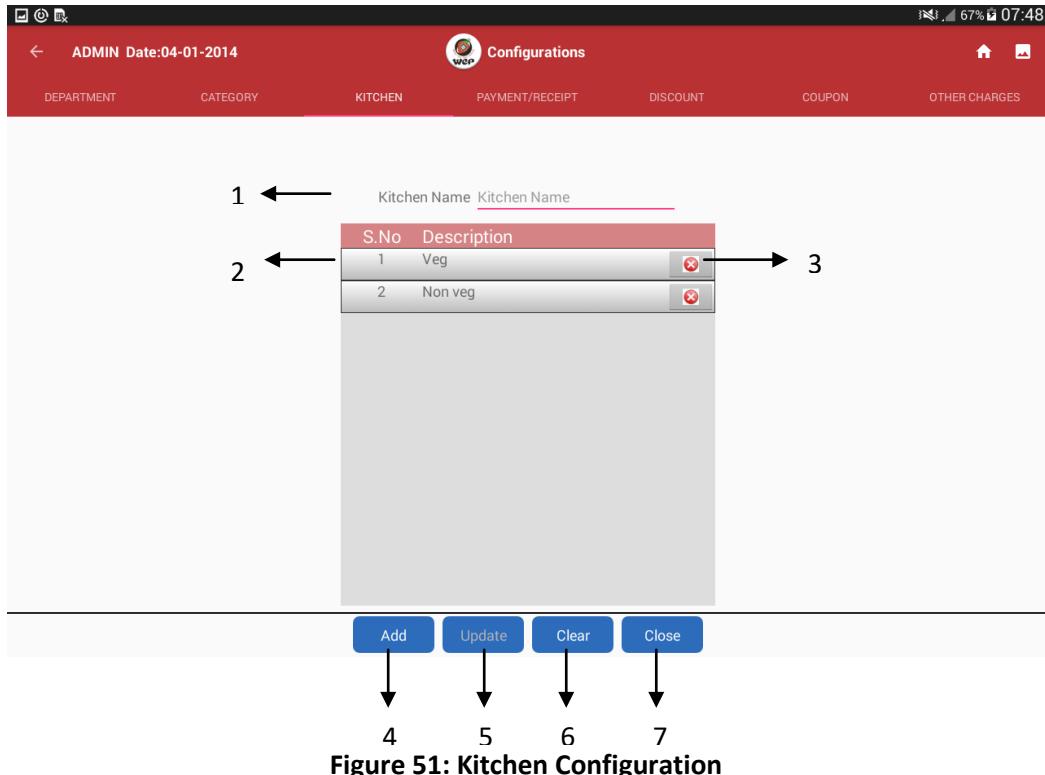

Figure 51: Kitchen Configuration

Label	Field	Description
1	Kitchen name	Name of the Kitchen user wants to add.
2	Kitchen List	List of the Kitchen.
3	Delete	Delete Kitchen from the list.
4	Add	Button to add new Kitchen name into database.

### WeP Solutions Limited

5	Update	Update details of an existing Kitchen.
6	Clear	Clear will clear all the fields.
7	Close	Closes the current screen.

#### 3.7.1.4 Payment/Receipt

This application allows user to manage user's expenditures in an organized way by allowing configuration of their payments or receipts and use later. [See Details](#) in Section 3.5.

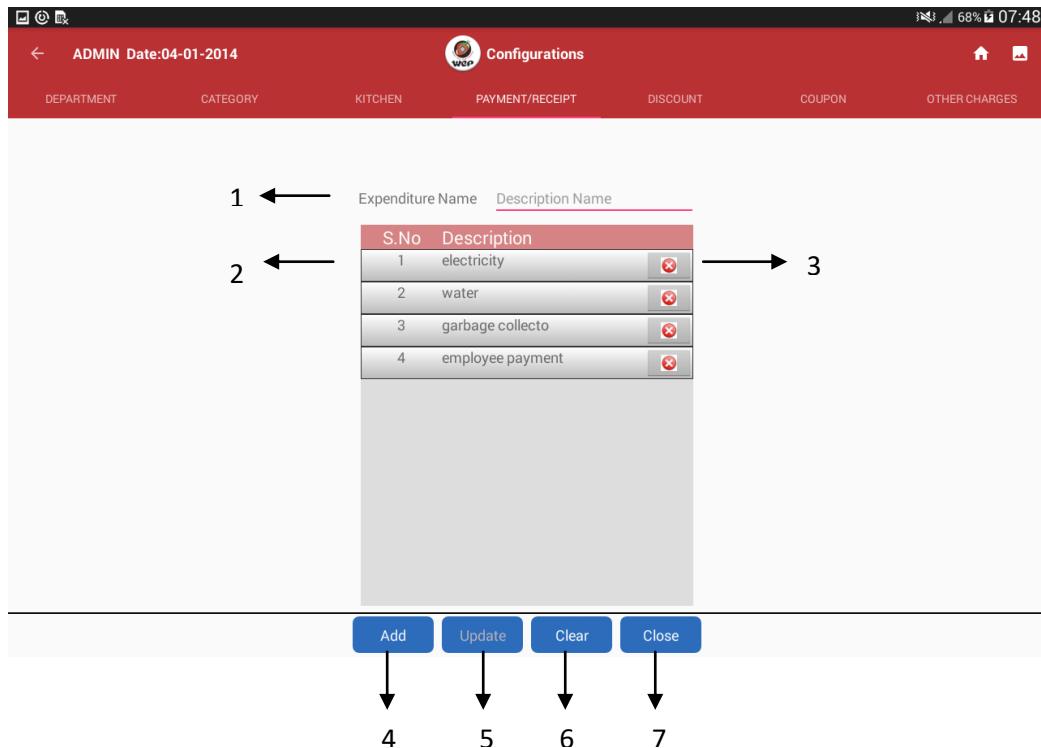

Figure 52: Payment & Receipts Configuration

Label	Field	Description
1	Payment/Receipt	Name of the Payment/Receipt user wants to add.
2	Payment/Receipt List	List of the Payment/Receipt.
3	Delete	Delete Payment/Receipt from the list.

### WeP Solutions Limited

4	Add	Button to add Payment/Receipt into database.
5	Update	Update details of an existing Payment/Receipt.
6	Clear	Clear will clear all the fields.
7	Close	Closes the current screen.

#### 3.7.1.5 Discount

Availing discounts to the customers is now made easy. User can configure various types of discounts, in percentage and can be used at the time of billing.

The screenshot shows the 'Configurations' screen with 'DISCOUNT' selected. The interface includes a header with the date '08-09-2017', a navigation bar with tabs for DEPARTMENT, CATEGORY, KITCHEN, PAYMENT/RECEIPT, DISCOUNT, COUPON, and OTHER CHARGES, and a footer with buttons for Add, Update, Clear, and Close. A note at the bottom states: '\*Please note % entered is taken upto 2 digits after decimal'. Arrows numbered 1 through 6 point to specific fields and buttons:

- Arrow 1 points to the 'Discount Description' input field.
- Arrow 2 points to the 'Discount Percent' input field.
- Arrows 3, 4, 5, and 6 point to the 'Add', 'Update', 'Clear', and 'Close' buttons respectively in the footer.

S.No	Description	Percent
1	Onam	5
2	Diwali bumper	23
3	New Year	10

Figure 53: Discount Configuration

Label	Field	Description
1	Discount Description	Description of the discount provided by the user.
2	Discount percentage	Discount in percentage.

### WeP Solutions Limited

3	Add	Button to add discount into database.
4	Update	Update details of an existing discount.
5	Clear	Clear will clear all the fields.
6	Close	Closes the current screen.

#### 3.7.1.6 Coupon

User can configure various coupons with amount and can use them at the time of billing.

e.g.: Sodexo coupons.

The screenshot shows the 'Configurations' screen with 'COUPON' selected. The interface includes a header with the date '04-01-2014', a toolbar with various icons, and a main content area with the following elements:

- Fields:** 'Coupon Description' and 'Coupon Amount'.
- Table:** A grid showing a single row of data:
 

S.No	Description	Amount
1	soxedo 50	50
- Buttons:** 'Add', 'Update', 'Clear', and 'Close'.

Arrows numbered 1 through 7 point to specific elements:

- 1 points to the 'Coupon Description' field.
- 2 points to the 'Coupon Amount' field.
- 3 points to the 'Amount' column of the table.
- 4 points to the 'Add' button.
- 5 points to the 'Update' button.
- 6 points to the 'Clear' button.
- 7 points to the 'Close' button.

Figure 54: Coupons Configuration

Label	Field	Description
1	Coupon Description	Description of the Coupon provided by the user.
2	Coupon Amount	Coupon in amount.

### WeP Solutions Limited

3	Delete	Delete a coupon from the list.
4	Add	Button to add Coupon into database.
5	Update	Update details of an existing Coupon.
6	Clear	Clear all the fields.
7	Close	Closes the current screen.

#### 3.7.1.7 Other Charges

User can apply extra charges to a particular service and can decide whether to charge customer or not by clicking on the check box. If check box is checked, then the amount is chargeable and will automatically be added into total bill. User can apply charges on a single or multiple services'. e.g.: User can apply other charges (as packing charges) to Home delivery mode and/or to take away mode.

S.No	Description	Amount	Chargeable	Modes
1	packing charges	70	Yes	Take Away
2	packing charges	70	Yes	Home Delivery

Figure 55: Other Charges Configuration

WeP Solutions Limited

Label	Field	Description
1	Other charge Description	Description of the Other charge provided by the user.
2	Other charge Amount	Other charge in amount.
3	Chargeable	Check the checkbox if user wants to charge for this other charges.
4	Charges mode	To which mode the other charge will be applied.
5	Delete	Delete Other charge from the list.
6	Add	Button to add Other charge into database.
7	Update	Update details of an existing Other charge.
8	Clear	Clear will clear all the fields.
9	Close	Closes the current screen.

### 3.7.2 Outward Supply Items

This allows user to configure an item that he is going to sell to the customer. User can configure following attributes about an item:

- a. Item name
- b. Kitchen
- c. Department
- d. Category
- e. Goods/Service
- f. Three different rates (Rate 1, Rate 2, Rate 3) {which rate is to apply can be configured in configuration. [See Details](#)in Section 3.6.1.}
- g. Stock
- h. Unit of measurement
- i. CGST, SGST, IGST and cess tax if applicable

## WeP Solutions Limited

- j. Item code, if enabled in settings ([See Details](#) in Section 3.6.9.4.)
- k. HSN code
- l. Discount (in percentage. Item wise discount can be enabled or disabled. [See Details](#) in Section 3.6.9.4.)

These attributes can be modified for an existing item. He can also upload an image for the item for a visual reference.

For huge amount of data about items, user can use a .csv file to import/load items from that file. Items in list are displayed in ascending order of Item code.

*Note: Previous data will be replaced on loading a .csv file. To save the previous data we recommend you to create a backup of the database first.*

Item Code	Item Name	Rate 1	Rate 2	Rate 3	Quantity	Image	Delete
1	JHATPAT KHAANA	8.60	8.60	8.60	310.20		<input type="checkbox"/>

### WeP Solutions Limited

Label	Field	Description
1	Item Name	Name of the item. Items can be searched by name also
2	Barcode	Barcode of the item.
3	Kitchen	Kitchen assigned to that item. (Can be configured in configuration. <a href="#">See details</a> in Section 3.6.1.3.)
4	Department	Department to which that item belongs to. (Can be configured in configuration. <a href="#">See details</a> in Section 3.6.1.1.)
5	Category	Category of the item. (Can be configured in configuration. <a href="#">See details</a> in Section 3.6.1.2.)
6	G/S	Goods or services
7	Rate 1	First rate applicable on the item.
8	Rate 2	Second rate applicable on the item.
9	Rate 3	Third rate applicable on the item.
10	Stock	Present stock of the item.
11	Discount	Discount Percent available on the item.
12	CGST/SGST/IGST/cess	CGST/SGST/IGST in percentage and cess rate in percentage. (If applicable)
13	HSN code	HSN code for the item.
14	Browse Image	Image for the item.
15	Browse File	Browse CSV file present in device's memory for bulk upload.
16	Upload file	Bulk upload of item details into application.

### WeP Solutions Limited

17	Generate Sample CSV	Generates a sample CSV. Patch where sample CSV is stored: Device Storage >WeP_FnB_CSVs
18	Add	Add a new item in the file manually one by one.
19	Update	Update an existing item.
20	Clear	Clears all the fields.
21	Close	Closes the current screen.

#### 3.7.2.1 Configuring Barcode Scanner (Recommended)

For using barcode of an item, user needs to configure barcode scanner to add line feed suffix.

For example: In case of Honeywell Barcode scanner, use below barcodes to turn on & off the line feed suffix.

**Warning:** Without line feed user won't be able to add an item directly into KOT after scanning barcode rather, it will show the item in barcode search results and user has to select the item from there.

Figure 57: Turn on line feed suffix

Figure 58: Turn off line feed suffix

### WeP Solutions Limited

#### 3.7.3 Price & Stock

Price & Stock screen facilitates user to modify stock and three different rates for that item in outward supply.

*Note: New stock will be added to existing stock.*

#### 3.7.4 Inward Management

This module facilitates configuration of inward supply details. Like supplier details, purchase order, inward item masters, etc.

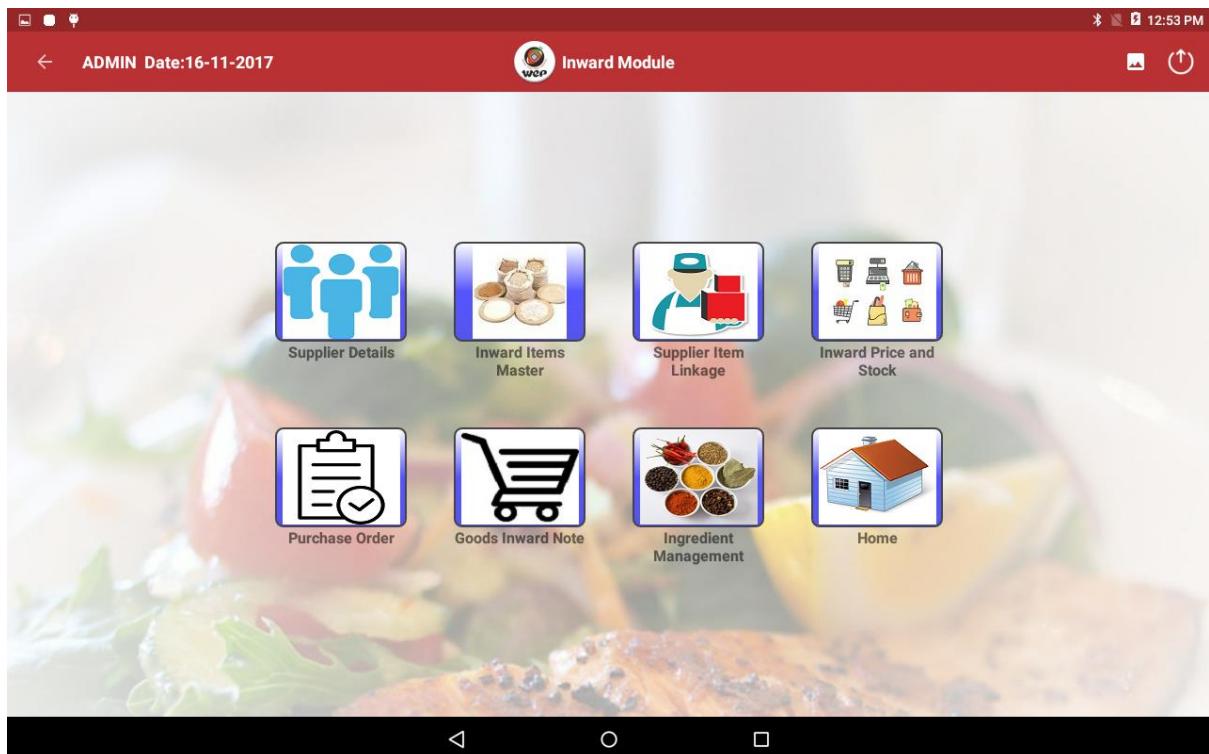

Figure 60: Inward Module

##### 3.7.4.1 Supplier Details

User can enter and save the supplier details in the database through this module.

Entered user details can be auto populated later at the time of Purchase order and Goods Inward.

## WeP Solutions Limited

18	Close	Closes the current screen.

#### 3.7.4.3 Supplier Item Linkage

This module provides mechanism to link the supplier already saved in database, with the inward items being entered in database. This linkage is easing the process of making entry in Purchase Order and Goods Inward. During Purchase Order or Goods Inward generation, upon entering the supplier details, all the items linked to that supplier is made available, instead of whole list of items.

## WeP Solutions Limited

## WeP Solutions Limited

### 3.7.4.7 Ingredient Management

Relating the inward items with outward items

The screenshot shows the Ingredient Management screen. At the top, there is a navigation bar with 'ADMIN Date:02-08-2017' on the left and a search icon on the right. The title 'Ingredient Management' is centered above a table. The table has columns for SNo, Ingredients, Quantity, UoM, and Delete. On the left side, there is a form for selecting an item ('ALOO PARANTHA') and adding ingredients ('POTATO', 'GARLIC'). A sidebar on the right lists various items with checkboxes. Arrows numbered 1 through 11 point to specific elements: 1 points to the item name input; 2 points to the ingredient search input; 3 points to the title bar; 4 points to the search icon; 5 points to a list item in the sidebar; 6 points to the sidebar header; 7 points to the 'Print Ingred. List' button; 8 points to the 'Save' button; 9 points to the 'Submit' button; 10 points to the 'Clear' button; and 11 points to the 'Close' button.

**Figure 67: Ingredient Management**

Label	Field	Description
1	Item Name	Enter item name for which user wants to enter ingredient. User can also search for the item by its name.
2	Select ingredient	Enter ingredient name. User can also search ingredient by its name.
3	Enter quantity	Quantity of the item.
4	Enter quantity	Quantity of the ingredient.
5	Add Item	Allows user to add an ingredient for the outward

### WeP Solutions Limited

		item.
6	Search Item	Search for the item by its name which has its ingredient list submitted in database.
7	Print ingredient list	Print ingredient list
8	Save	Save ingredient list for the outward items. But it is not the final list until it is submitted.
9	Submit	Submits the ingredient list for outward item.
10	Clear	Clear will clear all the fields.
11	Close	Closes the current screen.

#### Convert inward to outward

Allows user to convert inward items to outward items.

Note: Ingredients only appear if there exists goods inward note for that ingredient.

The screenshot shows the 'Ingredient List' screen. At the top, there is a search bar with 'Select Item' and 'Type Item Here' placeholder text, and another search bar with 'Select Ingredient' and 'Type Ingredient Here' placeholder text. Below these is a table with columns 'SNo', 'Ingredients', 'Item' (set to 'PAV BHAJI'), 'Quantity' (set to '500'), and 'UoM' (set to 'Mt'). A red 'Add' button is visible. The main table lists ingredients with their quantities and UoMs:

SNo	Ingredients	Quantity	UoM	Delete
1	OIL	60.0	No	X
2	ONION	60.0	Bx	X
3	GARLIC	60.0	Mt	X
4	CARROT	60.0	Pl	X
5	BREADS	60.0	Gm	X

At the bottom of the screen are three buttons: 'Print Ingred. List', 'Save', 'Submit Changes', 'Convert Inward to Outward', and 'Close'. Arrows below the screen indicate the sequence: 2 points to the 'Submit Changes' button, 3 points to the 'Convert Inward to Outward' button, and 4 points to the message 'Item to convert ingredients into item'.

Figure 68: Convert inward to outward

WeP Solutions Limited

Label	Field	Description
1	Add	Add more ingredients.
2	Submit Changes	Submit the changes made if any.
3	Convert inward to outward	Converts inward items into outward items.
4	Close	Closes the current screen.

### 3.7.5 Payment Mode Configuration

User can configure Key Id & Secret Key for enabling the ability to make payments through Razor Pay. To generate Key Id & Secret Key, user needs to register on Razor Pay website. To register [Click Here](#) or visit <https://razorpay.com/>

The screenshot shows a mobile application interface titled "Payment Mode Configuration". At the top, there is a header bar with the title "Payment Mode Configuration" and the date "Date: 19-09-2017". Below the header, there is a section for "Razor Pay" configuration. It contains two input fields: "Key Id" with value "xx" and "Secret Kev" with value "xx". Arrows labeled 1 and 2 point from these fields to the right. At the bottom of the screen are three buttons: "Update", "Clear", and "Close". Arrows labeled 3, 4, and 5 point downwards from these buttons respectively.

2	Secret Key	Razor Pay Secret Key
3	Update	Updates the changes made.
4	Clear	Clears all fields.
5	Close	Closes the current screen.

#### 3.7.6 Add Role

Add role screen allows user to define roles that can be assigned to other employees. User can also change the access for that particular role. e.g.: Sweeper is the new role that is added by the user. Now user can configure, what module can be accessed by that role (Rider).

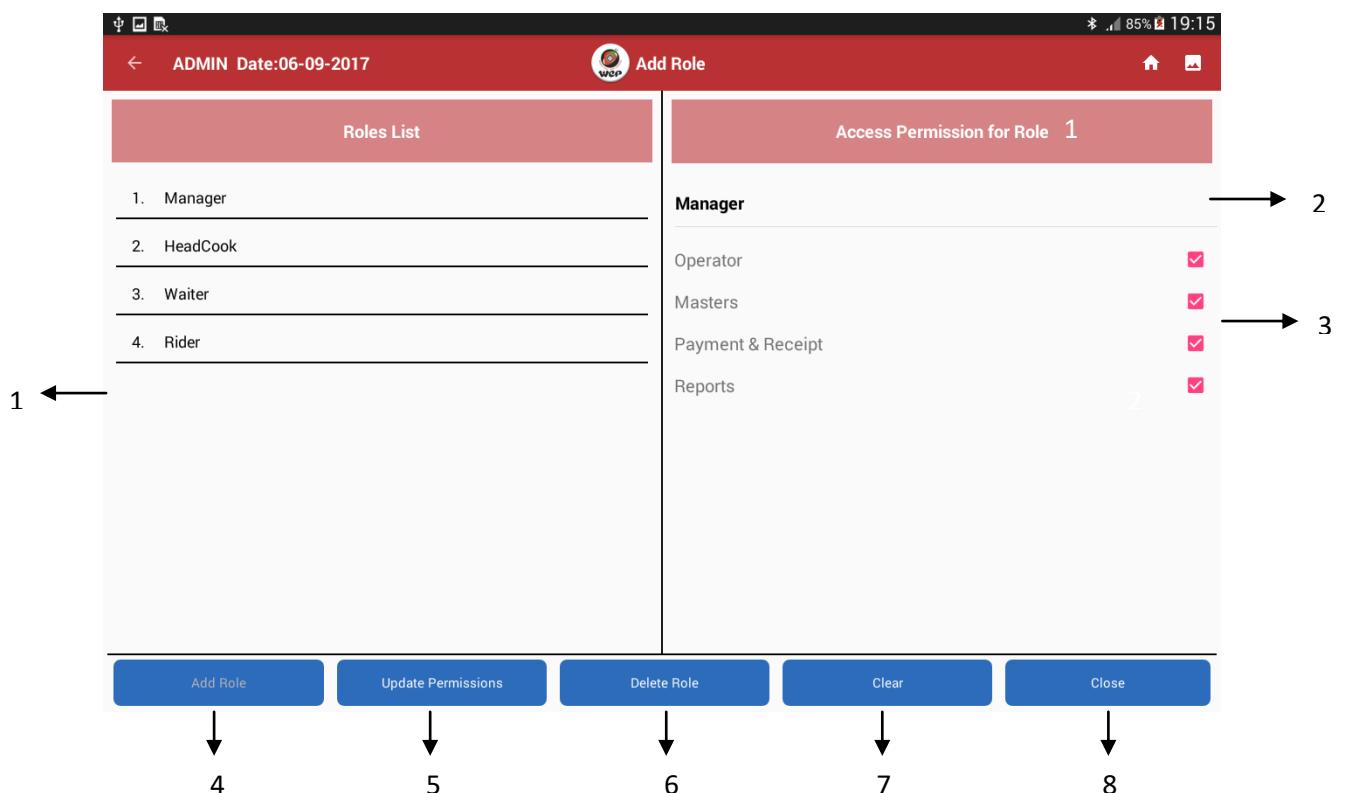

Figure 70: Add Role

Label	Field	Description
1	Role List	List of all roles including pre-added roles by

### WeP Solutions Limited

		system and user added roles.
2	Role Name	Name of the role user wants to add.
3	Permissions	List of permissions user wants to give to that role.
4	Add Role	Add a new role into database.
5	Update Permissions	<p>Update permissions of an existing role.</p> <p><u>Note:</u></p> <ol style="list-style-type: none"> <li>1. <u>Operator permission is default permission and will be given to every new role defined by user by default.</u></li> <li>2. <u>User cannot modify/update system default roles like "Manager, Head cook, Waiter".</u></li> </ol>
6	Delete Role	<p>Delete a role added by user only.</p> <p><u>Note: User cannot delete system added roles like "Manager".</u></p>
7	Clear	Clears all field.
8	Close	Closes the current screen.

#### 3.7.7 User management

This screen allows user to insert and delete a record of an employee and assign a role to him. User can also modify the employee details and change the role assigned to him earlier.

Default user admin can neither be updated nor deleted.

### WeP Solutions Limited

<b>Label</b>	<b>Field</b>	<b>Description</b>
1	Mobile no.	Customer's mobile. User can search for customers by customer's mobile number.
2	Customer's Name	Name of the customer. User can also search by his customer name.
3	Customer's GSTIN	Customer's GSTIN.
4	Customer's Name	Customer's Name.
5	Mobile no.	Customer's mobile no.
6	Address	Customer's Address.
7	Credit Amount	Customer's credit amount on the user.
8	Credit Limit	Maximum amount a customer can credit on merchant.
9	Delete	Delete a record.
10	Add	Add a new record.
11	Update	Update an existing record.
12	Clear	Clear the details of fields 3 to 7.
13	Close	Close the current screen.

#### 3.7.9 Settings

Settings screen allows user to configure:

- Header and footer that is going to be printed on bill.
- Different prices for different services provided by the restaurant
- Configure tables for dine-in.
- Owner details
- Settings for Inward supply configuration and Outward supply configuration.

## WeP Solutions Limited

- Application settings like Reset all settings, create a backup of current database image and factory reset to erase everything.
- Printers settings, like what will be printed from which printer.
- Other settings allow user to set options for date and time, fast billing mode, table splitting and etc.

### 3.7.9.1 Header Footer

Header will be printed at the top of the bill and footer will be printed at the end of the bill.

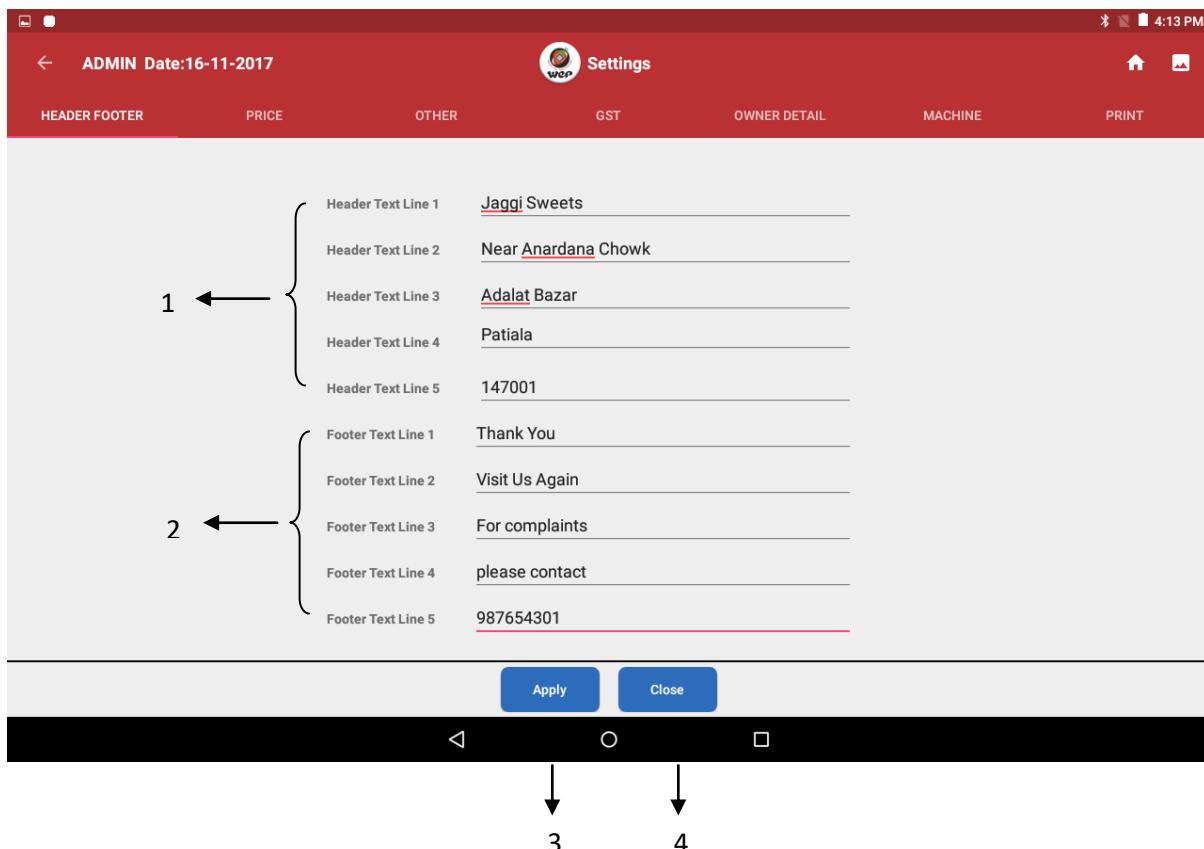

Figure 73: Header Footer Settings

Label	Field	Description
1	Header	The text will appear in the starting of the bill.
2	Footer	The text will appear in the end of the bill.

#### 3.7.9.4 Other

The screenshot shows the 'OTHER' settings page. The interface has a red header with tabs for HEADER FOOTER, PRICE, OTHER, GST, OWNER DETAIL, MACHINE, and PRINT. The OTHER tab is selected. The main area contains 16 numbered settings:

- 1: Date and Time (radio buttons for Auto or Manual)
- 2: Price Change (radio buttons for Enable or Disable)
- 3: Bill with Stock (radio buttons for Enable or Disable)
- 4: Item Code (radio buttons for Auto or Manual)
- 5: Bill No Daily Reset (radio buttons for Enable or Disable)
- 6: Tax (radio buttons for Forward or Reverse)
- 7: Discount Type (radio buttons for Itemwise or Billwise)
- 8: Fast Billing Mode (radio buttons for Items, Dept / Items, or Dept / Categ / Items)
- 9: Cumulative Report Heading (radio buttons for Enable or Disable)
- 10: Table Splitting (radio buttons for Enable or Disable)
- 11: Header Print Bold (radio buttons for Enable or Disable)
- 12: Owner's Details Print (radio buttons for Enable or Disable)
- 13: Service Name Print (radio buttons for Enable or Disable)
- 14: Bill Amount Round off (radio buttons for Enable or Disable)
- 15: (empty space)
- 16: (empty space)

At the bottom are 'Apply' and 'Close' buttons. A navigation bar at the very bottom includes icons for back, forward, and search.

Figure 76: Other Settings

Label	Field	Description
1	Date and Time	<b>Auto:</b> Application will automatically picks up the

### WeP Solutions Limited

		device's date and time.  <b>Manual:</b> User can manually select a date and time.
2	Price Change	If enabled, user has the facility to change the price of an item at the time of billing.
3	Bill with stock	If enabled then on every bill generated, quantity of items will be deducted from the stock.
4	Item no. reset	<b>Auto:</b> Application will auto pick the initial count. e.g.: default is 1.  <b>Manual:</b> User has the facility to enter the item code of his choice in item masters.
5	Bill no. daily reset	If enabled bill number will be changed to 1 count after a day is ended.
6	Tax	Allows user to select a Type of Tax from Forward and Reverse tax.  <u>Note: Bill-wise Discount and cess is not applicable in Reverse Tax. Only Item-wise discount is applicable.</u>
7	Discount type	User can provide discount on item or on bill.
8	Fast Billing Mode	<b>Items:</b> Only items will be shown at the time of billing.  <b>Department/Item:</b> Department and Items both will be shown at the time of billing. User can sort items according to departments.  <b>Department/Category/Item:</b> All three things will be shown at the time of billing and user can sort

### WeP Solutions Limited

		items according to departments and then by category.
9	Cummulative Report Heading	If enabled, then a cummulated report will be generated for all the services provided by the user.
10	Table Splitting	If enabled, then user can allow his customers to share theirtable with other party.
11	Owner's details print	If enabled, then own details will be printed on bill.
12	Header print bold	If enabled, header will be printed in bold.
13	Bill amount round off	If enabled, the bill amount will be rounded off.
14	Service name print	If enabled, then service name will be printed on bill.
15	Apply	Apply changes.
16	Close	Close the current screen.

## 5. Amend Module

### 5.1 GSTR2

The screenshot shows the 'Amendments' section of the WeP Solutions Limited software. The interface is divided into several panels:

- GSTR2 Panel:** Contains fields for 'Original Details' (Supplier Type\*, GSTIN/Name\*, InvoiceNo\*, Invoice Date\*) and 'Revised Details' (GSTIN, Inv No., Inv Date).
- GSTR1\_B2B Panel:** Shows 'Taxable Value' and 'G/S' status.
- GSTR1\_B2CL Panel:** Shows 'IGST Rate(%)', 'IGST Amount', 'CGST Rate(%)', 'CGST Amount', 'UTGST / SGST Rate(%)', 'UTGST / SGST Amount', 'Supplier's POS', and 'cess Amount'.
- GSTR1\_B2CS Panel:** Shows 'Taxable', 'IGST', 'CGST', 'UTGST / SGST', 'cess', and 'Delete' buttons.

Annotations with numbers 1 through 12 point to specific fields and buttons:

- 1: Supplier Type\*
- 2: GSTIN/Name\*
- 3: InvoiceNo\*
- 4: Invoice Date\*
- 5: IGST Rate(%)
- 6: Taxable
- 7: CGST Rate(%)
- 8: UTGST / SGST Rate(%)
- 9: Load button
- 10: Add button
- 11: Clear button
- 12: Close button

Notes at the bottom of the screen:

- \*Please note, decimal values entered will be taken upto 2 decimal digit
- \*\*For registered supplier , please enter GSTIN. For unregistered supplier, please enter supplier's name

Figure 87: GSTR Amend

Label	Field	Description
1	Supplier Type	User can choose the supplier type – registered or unregistered

### WeP Solutions Limited

2	GSTIN/Name	User can enter either GSTIN or Name of the supplier.
3	Invoice number	Invoice number for which amends are supposed to me made.
4	Invoice date	Date on which the invoice was generated.
5	Taxable Value	Applicable taxable value.
6	G/S	Whether it was goods or services.
7	IGST/CGST/SGST (%)	Percentage of tax which is applicable on goods/services
8	IGST/CGST/SGST/cess amount	Tax applicable on goods/services in amount.
9	Load	Load any existing amends for that invoice number and invoice date.
10	Add	Add a new amend to the database.
11	Clear	Clears all the fields.
12	Close	Closes the current screen.

## WeP Solutions Limited

### 5.2 GSTR1 B2B

The screenshot shows the 'Amendments' section of the WeP Solutions Limited GSTR1 B2B software. The interface includes:

- Header:** ADMIN Date:01-01-2014, GSTR1\_B2B.
- Fields:** GSTIN\*, InvoiceNo\*, Invoice Date\*, Taxable Value\*, G/S, IGST Rate(%), CGST Rate(%), UTGST / SGST Rate(%), CustStateCode, IGST Amount, CGST Amount, UTGST / SGST Amount, cess Amount.
- Table:** A grid showing invoices with columns: Sno, Original Details (GSTIN, Inv No., Inv Date), Revised Details (GSTIN(Ecomm), Inv No., Inv Date), Taxable, IGST, CGST, UTGST / SGST, cess, Delete.
- Buttons:** Load, Add, Clear, Close.
- Arrows:** Numbered arrows (1-11) point to specific elements: 1 to GSTIN, 2 to Invoice No., 3 to Invoice Date, 4 to Taxable Value, 5 to G/S, 6 to CustStateCode, 7 to UTGST / SGST Amount, 8 to Load, 9 to Add, 10 to Clear, 11 to Close.

Figure 88: GSTR1 B2B Amend

Label	Field	Description
1	GSTIN	User can enter either GSTIN of the supplier.
2	Invoice number	Invoice number for which amends are supposed to me made.
3	Invoice date	Date on which the invoice was generated.
4	Taxable Value	Applicable taxable value.
5	G/S	Whether it was goods or services.
6	IGST/CGST/SGST (%)	Percentage of tax which is applicable on goods/services

### WeP Solutions Limited

7	IGST/CGST/SGST/cess	Tax applicable on goods/services in amount.
8	Load	Load any amend if already existing for that invoice.
9	Add	Add a new amend to database.
10	Clear	Clear every field.
11	Close	Closes the current screen.

#### 5.3 GSTR1 B2CL

The screenshot shows the 'Amendments' screen for GSTR1\_B2CL. The interface is divided into several sections:

- Original Details:** Recipient's Name\*, InvoiceNo\*, Invoice Date\*, Taxable Value\*, Invoice No\*, Invoice Date\*, G/S, Cust StateCode\*.
- Revised Details:** IGST Rate(%), IGST Amount, cess Amount, G/S, Cust StateCode\*.
- Table:** A grid for amendments with columns: Sno, Ori.Inv No, Ori. Inv Date, Rev.Inv No, Rev. Inv Date, G/S, Taxable Value, IGST Amount, cess Amount, Delete.
- Buttons:** Load, Add, Clear, Close.

Arrows numbered 1 through 10 point to specific fields and buttons:

- Recipient's Name\*
- InvoiceNo\*
- Invoice Date\*
- G/S
- Taxable Value\*
- IGST Rate(%), IGST Amount, cess Amount
- Load
- Add
- Clear
- Close

7	Add	Add a new record to database.

### WeP Solutions Limited

8	Clear	Clear every field.
9	Close	Closes the current screen.

## 6. Credit Debit Note

The screenshot shows the 'Credit/Debit Note' application interface. The top bar displays the date '06-09-2017'. The main area is titled 'OUTWARD C/D NOTE'. It contains fields for 'Original Invoice :', 'Differential :', 'Rate %', 'Amount', and 'Information :'. A blue button labeled 'Ok' is highlighted. Below the information section is a table with columns: SNo, Note Type, Note Date, Note No, Diff. Value, GST Rate, IGST Amount, CGST Amount, UTGST/SGST Amount, cess Amount, and Del. At the bottom, there is a note about compulsory fields and decimal values, followed by four blue buttons: 'Load', 'Add', 'Clear', and 'Close'. Arrows numbered 1 through 13 point to various elements on the screen.

**Figure 91: Credit Debit Note**

Label	Field	Description

## 7. Day End

User can end hisday of business by clicking on “Day End” in home screen. If Date and Time is set to automatic then application will automatically pick the device’s date and time and if user has set date and time to manual then user will get an option to choose the date on which he wants to end his day. For settings [click here](#) in Section 3.6.9.4.

## 8. Pay Per Use

In this model user can pay according to the usage of application. User will be charged based on number of invoices generated per month. Here, whenever the bill is made, application will update the bill count for that business date in the database and will send the data to WeP Metering Server, if connected to the Wi-Fi. If device is not connected to Wi-Fi for more than 30 days then the application will get locked and will only be accessible after connecting to Wi-Fi and sending the bill count to WeP Metering Server. Based on the bill count, the bill will be generated and posted on the panel. Customer has to go to panel and pay the bill.

## 9. Limitations & Recommendations

1. Item search through barcode is recommended to be done through barcode scanner.
2. Payment like eWallet , MsSwipe requires good internet connectivity.

## 10. FAQs

### **Q. Is any configuration required for barcode before using?**

A. Yes, kindly configure your barcode scanner to return line feed after scanning.

### **Q. Upon using clicking MSwipe Payment, I am being asked for username and password. Where do I get these?**

A. You will be provided with username and password at the time of purchase of MSwipe Machine.

### **Q. On clicking Wallet Payment, I am getting message “Invalid credentials”**

A. You have to go to RazorPay website and get register. Upon successful registration, you will be provided with Key Id. Go to payment mode configuration and enter this Key Id and save it. Now you will be able to use Wallet Payment.

### **Q. After scanning barcode of an item, it is not added into KOT**

A. User needs to configure their barcode scanner to add line feed suffix, only then you will be able to add item in KOT directly after scanning item's barcode. [See Details](#) in section 3.6.2.1.

### **Q. The application is blocked; I am getting message “Your application has been blocked as you have not uploaded the metering data ...”**

A. You have to connect your device to Wi-Fi so that application can upload metering data to the WeP metering server. Once the upload is done you will be able to use the application again. This message comes when device didn't get access to Wi-Fi for more than 30 days. [See Details](#) in section 8.
